

GUARD IT WITH **GATOR**

LIGHTWEIGHT CONSTRUCTION

This method of construction is a blend between dense foam and nylon. The interiors are constructed with a dense EPS foam that is shaped to create a "hard" case. Then we cover the foam with high quality 600 denier nylon to make it appear similar to a bag yet have the rigidity of a hard case.

DENIER NYLON

A strong nylon material that is used in the construction of bags. The higher the number, such as 600-denier, the better the quality. 600-denier is highly tear-and-water-resistant.

PE - HIGH DENSITY POLYETHYLENE

PE is a rugged plastic material which has a high resistance to impact. PE provides good performance in low temperatures where other plastics would crack and is highly resistant to both chemicals and moisture. Gator uses PE for the products that need to take the hardest beating on the road.

Find The Perfect Fit By Using Our
Online Find Your Case Tool

The screenshot shows a web interface for finding a Gator case. It has a red header with the Gator logo. Below the header, there's a section titled '+ FIND YOUR CASE' with instructions: 'Find the Perfect Gator Case Match! Use the dropdown menus to select your gear or enter the product dimensions below.' There are two dropdown menus: 'Select A Manufacturer' and 'Select Your Product'. Below these is a 'GO!' button. Another 'GO!' button is next to the text 'Can't find your product?'. Below that is a 'Search by Dimensions' section with radio buttons for 'Inches' and 'Millimeters'. To the left is an image of a case with dimensions L (Length), W (Width), and H (Height) labeled. To the right are input fields for 'Length:', 'Width:', and 'Height:'. At the bottom right of the form is another 'GO!' button.

G-TOUR™

G TOUR™ is a Gator designed flight case with heavy-duty aluminum extrusions and rugged laminated plywood exterior.

ABS - ACRYLONITRILE BUTADINE STYRENE

ABS plastic has good impact resistance and impact absorption. It is easily formed to make all shapes and sizes. Gator uses ABS for the cases that are designed to offer strong hard case protection but do not need the extreme durability of PE.

EVA ETHYLENE-VINYL ACETATE

EVA is a polymer used to absorb physical shock. Gator uses EVA to give extra protection between foam and nylon along with forming tough contoured molded pieces.

ROTO-MOLD

The rotational molding process is a high temperature, low pressure plastic forming process that uses heat and biaxial rotation (rotation on two axes) to produce hollow, one piece parts. Gator utilizes roto-molding for large format products that require form fitting capabilities.

EPS FOAM – EXPANDED POLYSTYRENE

EPS is a thermal plastic material. It is formed to make a dense foam that is ideal for creating form fit protection for the product. Gator uses EPS to create case interiors and structures.

Adjustable cord for snug fit on keyboard

Model	Description
GKC-1540	Stretches to fit most 61 and 76 note keyboards
GKC-1648	Stretches to fit most 88 note keyboards

ELITE SERIES

The revolutionary Elite Air Series design features an oversized case with tailor-made contours and shaped foam strips to securely cushion each drum. The drum rests in the middle, away from side walls, which provides a snug fit and eliminates the need for foam. The unique shape is designed to accommodate most suspended mounting brackets without "up-sizing" and comes with a limited, lifetime warranty against cracking.

The Elite Air Combination Tom case blends Elite's optimum protection with the convenience of one case. The contoured divider allows smaller toms to securely sit atop larger toms and is available for 10" & 12" and 12" & 13" tom combinations.

Model	Case Diameters Available
TOM CASE	8" - 10" - 12" - 13" - 14" - 15" - 16" - 18"
BASS DRUM CASE	18" - 20" - 22" - 24"
SNARE CASE	10" - 12" - 13" - 14"
COMBO CASE	10" / 12" - 12" / 13"

DRUM RIM
DRUM SHELL
CASE

What makes the Elite Series Different? The Drum Floats in the Center of the Case!

Check out the video of this product on our website

Combo Tom Case Includes contoured divider for secure stacking

Heavy-duty buckles lock the lids in place

Rugged, comfortable carry handles

EVOLUTION SNARE DRUM CASE SERIES

- Patented suspension system of molded-in suspension platforms with foam rubber pads center the drum and suspend it by contacting the rim at only eight points. This floats the drum inside the case and creates air-space around the drum shell, hardware, and heads
- No pressure on the heads or shells means better tuning stability
- 2" wide web strap and YKK side-release buckle. Rated at 350 lbs tensile strength
- Lightweight rotationally molded polyethylene plastic
- The octagonal shape creates extra room inside the case to accommodate suspension mounts, hardware, and strainer throw-offs.
- Flat outer faces provide a stable base for resting the case. No more rolling around
- Extra side crush protection; the top edge of the bottom shell is captured in the lid to prevent side impacts from reaching the drum
- Outer case shell design includes ribs for added strength and secure stacking

Air Space

GP-EVOL13/1407SD	13" or 14"	7"

CLASSIC SERIES

Recognized as the industry standard rotationally molded drum cases, ProtecTOR Cases' Classic Series provides strength, durability and simplicity for almost any drum size. The rotational molding process gives added strength and durability to case corners and provides water resistance that non-roto molded cases can't match. Custom depths and colors are available. All ProtecTOR Cases come with a limited, lifetime warranty against cracking.

The Multi-Tom case features rounded pockets to make room for floor tom leg mounts. The 34" maximum depth allows for any combination of floor toms (up to 16" diameter), mounted toms and/or snares.

Model	Case Diameters Available
TOM CASE	8" - 10" - 12" - 13" - 14" - 15" - 16" - 18"

- Master on/off switch with indicator light
- Five outlets (four rear, one front)
- Push to reset 15 amp circuit breaker
- Rugged pull-out handle and roller blade-style recessed wheels
- Front and rear rack rails

G-SHOCK-4L

Independent rubber shock absorbers at each corner

7mm threaded field replaceable commercial-grade plated rack rails

POLYETHYLENE MOLDED SHOCK RACKS

Gator's lightweight polyethylene shock racks are built for protection and function. The shock rack is specifically designed to allow 360 degree air ventilation around equipment to keep your gear running cool. Adjustable interior sliding support on each side of the rack adjusts front to back and up and down for rear support of gear to eliminate shifting and jostling. Recessed side handles give your hands a break while the locking lid gives you peace of mind.

Model	Rack Units	Rack Depth
G-SHOCK-4L	4	19.5"
G-SHOCK-8L	8	19.5"
G-SHOCK-12L	12	19.5"
G-SHOCK-16L	16	19.5"

CONSOLE RACKS

- Lightweight polyethylene construction
- Front, rear & top rack rails with rear wire access
- Recessed side handles
- Compact size for easy transport

GRC-10X12 PU

GRC racks have 7mm threaded field replaceable commercial-grade rack rails

Pop-up top-loaded racks include a ratchet top which allows adjusting to various angles during use and transporting with the top flat

GRC-10x11 PU & GRC-12x10 PU feature 4" heavy-duty Industrial casters, two of which are locking

ROLLING RACK BASE

Rolling rack bases are made of lightweight polyethylene plastic and conveniently fit under any Gator GRC or standard rack case. The four easy rolling wheels include two locking wheels for keeping the rack base in position. The butterfly-style twist latches and recessed side handles make it the ultimate pack and load solution.

Model	Rack Units	Rack Depth
GRC-BASE-10	10	22.75"
GRC-BASE-14	14	22.75"

ROTO MOLD RACK CASES

Gator's virtually indestructible rotationally molded polyethylene rack cases are the ultimate in durability. The 19" deep rack cases are available in standard or rolling versions. All cases come with full sized front and rear rack lids for easy access. The rolling version includes a telescoping tow-handle and rugged in-line style wheels. The black version is made entirely from recycled materials. *Custom colors available for minimum quantity orders.

Patented pop-up ratchet system for transporting your mixer flat then elevating to various angles during use

ATA TSA POP-UP MIXER CASES

Gator's Pop-Up Mixer Series uses the patented Pop-Up ratchet system for transporting your mixer flat then elevating to various angles for a quick setup. The compact size allows for smaller transportation area requirements, but this case is big on features. The Pop-Up mixer cases include a high density polyethylene shell, TSA locking latches, threaded rack rails, black uninterrupted valance design, and comfort ergo-grip handles making this a perfect grab-n-go solution.

ATA POP-UP MIXER CASE

Gator's ATA Pop-Up Mixer case uses the patented Pop-Up ratchet system for transporting your mixer flat then elevating to various angles in the field. The compact size allows for smaller transportation area requirements. The Pop-Up mixer case includes a high density polyethylene shell, threaded rack rails, spring loaded twist latches, chrome-plated corners, pull-out handle, recessed wheels and spring-loaded handles. This mixer case combines protection with functionality for a complete solution.

ROTATIONALLY MOLDED LCD/PLASMA CASE

Gator's G-LCD series is designed to offer serious protection and easy mobility to a wide range of consumer and commercial LCD / Plasma screens, with a price tag that still makes sense for today's value priced LCDs. Rotationally molded from rugged polyethylene plastic and featuring a unique molded screen support system, the G-LCD is sure to be the new standard in LCD transport. Made in the USA from recycled materials.

- Virtually indestructible LLDPE polyethylene lightweight plastic construction
- Two unbreakable, molded-in handles on base for lifting and loading
- Aluminum extrusion handles for lid removal
- Built-in dry erase white board to label contents
- Heavy-duty 3" casters with rubber wheels; includes two swivel casters with brakes and two fixed casters for control and steering
- Heavy-duty 1.5" nylon web straps and YKK buckles secure lid to base
- Molded end supports with foam lining protect screen from shock
- Integrated "UP" arrows notify shippers to keep upright during transport
- Will accommodate most screens with pedestal stand attached
- Black cases are made from 100% recycled material
- G-LED-3747-2X & G-LED-5055-2X each fit two LED screens per case & adjust from 1.5" to 3" depth
- Patent pending

iD
S E R I E S

GATOR frameworks

our**brand**

Gator Frameworks was developed by musicians and audiophiles that are passionate about their gear. Every stand must meet the scrutiny of the product designers that "Yes, this is the one I would choose to buy and use on stage, at work or in my home".

From the get-go we wanted to do something new, something that looked sleek and that worked better than anything in the market today. From this ideology was born what we at Gator Cases call our iD series, a truly new stand line redesigned from the ground up to be our iD in the market. This series incorporates clean lines that allow them to easily be stored and look elegant when in use. Every one of the mechanisms were diligently thought through and tested to ensure they not only looked great but worked in a way that was natural and easy to use.

At the core of all Gator Frameworks product design is the mission for it to be easy to operate and to hold up to extensive use. The handles, knobs and mechanisms are designed to operate in the most instinctive way and to feel comfortable in your hand. Our goal is to humanize every product. We utilize only the best of materials and have added attributes such as thicker extrusion and anodized parts to every product in order to ensure that they will endure the rigors of the field.

In the end our mission is to create products that you do not have to worry about, products that do their job so that you can focus on what you are passionate about: your music.

The focus of Gator Frameworks is to ensure that every contact point that you operate your stand feels comfortable in your hand and functions smoothly. Every latch, clutch, knob and lever has been researched and designed to protect your hand and to make operating the stand smooth. Functionally, every stand is designed to operate as simply and naturally as possible. Fine details, like matte finished surfaces, are a deliberate choice to make the stand less intrusive on its environment, whether at home or on the stage.

We support your music... literally.
