

Avante Stationary DR Digital

X-Ray System

Seamless acquisition, processing, and image management

The Avante Stationary DR Digital X-Ray System is a veterinary x-ray system with a high frequency generator and four-way floating tabletop that provides veterinary facilities with excellent image quality while maintaining low x-ray doses. The unit is a fully integrated, all-in-one, digital radiography solution for the busy veterinary practice.

Its compact size and moveable casters allow clinicians to easily position the Avante Stationary DR Digital X-Ray System, even in facilities where space is at a premium. With an easy-to-use touchscreen, clinicians can easily select the animal species, size, and body part for quick and efficient setup. Compatible with 14x17 and 17x17-inch x-ray flat panels.

FEATURES

- High frequency generator system designed for use with flat panel detectors.
- Four-way floating tabletop for superior x-ray positioning with minimal disturbance to the subject.
- Captures clear x-ray images in only three seconds.
- Easy-to-use touchscreen for quick navigation through x-ray protocols.
- Features computer-controlled technique input.
- 24/7 online chat support for clinical and technical support.
- Veterinary-specific software allows clinicians to easily select the animal species, size, and body part being imaged.
- Achieve clear x-rays with image adjustments: contrast, brightness, add TTLO, TPLO, and Heart Score.
- Compatible with 14x17 or 17x17-inch x-ray flat panels.
- Compact unit with moveable casters for convenient positioning throughout the facility.
- Low dose design and remote capture feature help to lower clinician and patient exposure.
- Process, store, and view images efficiently with the unit's industrial-grade CPU.
- View x-ray images anytime, anywhere on any internet enabled device.
- Comes standard with 5 years of unlimited secure PACS cloud service.
- Easy to clean with built-in urine trap.
- Optional — table extension.
