

Datascope Passport 2

Patient Monitor

The Datascope Passport 2 makes monitoring simple

Very easy to use with navigator knob and dedicated function keys. Maximum visibility with a 10.4" color TFT display and large numerics. Simple use and display management — six waveforms with automatic waveform display configuration. Most configurations feature 6 waveforms, 3 or 5-lead ECG with ESU noise rejection, lead-selectable resp., NIBP, Masimo SET® motion tolerant SpO2 and temp. Optional features include arrhythmia analysis, Microstream® ETCO2 , Nellcor® SpO2 , dual invasive pressures, 3-lead ST analysis with trends and alarms, and dual trace recorder. Store up to 120 patient time measurements with list and graph trends — extended memory can expand to 500 entries.

FEATURES

- › 10.4" color TFT display
- › 3 to 6 waveforms with automatic expansion
- › Auto-adjustable large numerics
- › 3 or 5 lead ECG with ESU noise rejection, lead-selectable respiration, NIBP, Masimo SET® motion-tolerant SpO2 , and temperature (400 or 700 series YSI probes)
- › ECG and IBP analog output available for synchronization to balloon pump
- › 6-minute OXY-CRG trend for neonatal and pediatric applications
- › Built-in power supply for direct AC connection
