

# GE LightSpeed RT 16

## CT Scanner

Effectively balances speed, coverage, dose, and resolution

The GE LightSpeed RT 16 allows clinicians to provide a wide variety of applications, while maintaining accuracy. This system provides 16-slice acquisition with outstanding image clarity, and includes a wide-bore design and fast scan times help to increase patient comfort.

### FEATURES

- Popular CT scanner considered one of the world's leading CT scanners for cancer care.
- Allows clinicians to perform a wide variety of applications while delivering exceptional comfort to patients.
- Wide-bore system is easy to operate with predefined protocols.
- Provides 16-slice acquisition with outstanding image clarity and 20mm of coverage.
- Accurate 3D visualization and fast scan times improve productivity.
- Fast scan times also help to increase patient comfort.
- Optimized workflow from acquisition to final report.
- Precise positioning of patients, even in the most challenging cases.
- Wide display field of view measures 65 cm.
- Gantry opening measures 80 cm.
- Full DICOM connectivity.
- 219 GB memory system.
- Xtream technology
- Breathing lights with countdown timer
- In-room start
- Slip-ring technology with advanced axial scanning
- Full 360° rotational scans
- Natural, intuitive user interface
- Remote gantry tilt

by Avante

### SPECIFICATIONS

Patient Weight Capacity:  
500 lb

Gantry (Max. Clearance):  
80 cm

Image Display:  
65 cm

Slices:  
16

Type (Configuration):  
Multislice
