

Image-Vet FleXX

Handheld Dental X-ray Generator

Designed for convenient,
one-hand operation

The Image-Vet FleXX is a portable intraoral handheld x-ray generator ideal for use in the field. With a compact shape and complimentary neck strap, the unit can be conveniently operated using one hand. The user-friendly design allows veterinary practitioners to significantly reduce the time needed for a complete set of dental radiographs.

FEATURES

- Lightweight dental x-ray generator is extremely portable for use in any care setting.
- Compact unit weighs only four pounds.
- High frequency unit operates at 60kV/2mA.
- Designed for convenient, one-handed operation.
- Unit is FDA-approved for handheld use.
- Generates less harmful radiation than conventional systems.
- No assembly or installation required.
- Offers rapid imaging, reducing time between radiographs.
- Get up to 500 shots per charge with the high capacity Lithium-ion battery.
- Oil-cooled Toshiba tube.
- Standard configuration: two rechargeable batteries, neck strap, back scatter shield and carrying case.
- Integrates with EVA Vet Dental Imaging Systems, as well as other digital sensors and dental films
