

# Mindray DPM5

## Patient Monitor

Straightforward and transportable monitor well-suited for any medical department

At just over 10 pounds, the Mindray DPM5 Patient Monitor can be transported quickly from room to room. The monitor features quick-action keys on the front panel, allowing operators to easily set-up and begin use. The clear, TFT color display panel can show up to eight waveforms for maximum data analysis of the following parameters: 3 to 5-lead ECG, NIBP, Nellcor® Oximax® SpO2, pulse rate, respiration, dual-channel invasive blood pressure and dual-channel temperature. The Mindray DPM5 is available with EtCO2 measurement, arrhythmia and ST analysis in a variety of mounting options.
