

# SciCan Statim 5000

## Autoclave

### Fast, Gentle, Reliable, and Smart.

The SciCan Statim 5000 cassette autoclave (or steam sterilizer) uses a steam injector system provides temperature consistency and expels the air which causes oxidation. This process is effective on hollow and solid instruments. The Statim 5000 has a 9-minute complete sterilization cycle. Key pad operation and display screen gives users an easy interface
