

Avante iWarm

IV Fluid Warmer

Keep your patients stable and comfortable by warming the desired fluid

Introducing the iWarm IV Fluid Warmer with Dry Heat Exchange technology, the ultimate solution for rapid fluid warming. Using intelligent technology, this device quickly brings the fluid temperature to that of the patient, ensuring optimal comfort and stability. With easy-to-read indicators, you can monitor the warming process, temperature status, and prevent overheating.

FEATURES

- Portable and lightweight
- Operating temperature up to 113°F / 45°C
- Flow rate: 0.1 -338 mL / hour
- Visual and audible alarms, with overheat protection
- Monitors temperature second to second

SPECIFICATIONS

Weight:
1.4 lbs

Dimensions:
7" L x 4" W x 2" D

Operating Temperature:
up to 113F / 45C

Flow Rate:
0.1 -338 mL / hour

Indicator Lights:
power (green), warming (orange), and overheating (red)

Standard Accessories:
Power cord
