| PRODUCT                      | GAFFAIR 400W HMI                                                                                    |
|------------------------------|-----------------------------------------------------------------------------------------------------|
| Shape                        | Elliptical                                                                                          |
| Source                       | HMI                                                                                                 |
| Lamp                         | 400W HMI                                                                                            |
| Lamp holder type             | GZZ9.5                                                                                              |
| Average lamp life            | 750 hours                                                                                           |
| Ballast                      | PowerGems flicker-free                                                                              |
| Diameter of the balloon      | 2.95ft                                                                                              |
| Filters                      | 1/2 CTO & Full CTO                                                                                  |
| Boom                         | Three-section flexible from 5ft to 13 ft                                                            |
| Accessories                  | Tilting head device<br>Rigging accessories<br>Harness + belt clip<br>Shoulder strap<br>Black skirts |
| Dimensions of the kit        | 4.60'x1.35'x0.50'                                                                                   |
| Packaging                    | Solid foamed case with wheels                                                                       |
| Set up time                  | 15 min                                                                                              |
| Maximum lumen                | 48 000                                                                                              |
| Theoretical color temp. (°K) | 5 600                                                                                               |

## Marty Bossworth, Best Boy, USA:

"The Gaffair 400W HMI by Airstar can be used as a key light to produce a very natural effect. It is also ideal for close-up and tracking film shots."
