

Translink route data (Geo) – Supplementary notes

Service number attribution - 'LineDIVA' field

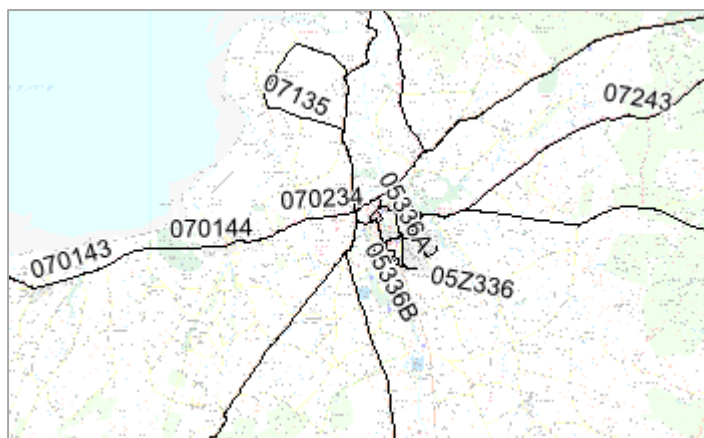

You will find service number attribution on the supplied files in the 'LineDIVA' field. This is made up of three main pieces of information combined to make one string. The full route number is a combination of the last two pieces of information as shown in the table below in red.

E.g. 19**007B**

Operating Branch	Service number	Service variation (optional)
<i>2 char</i>	<i>3-4 Char</i>	<i>1 Char</i>
19	007	B

The above example translates as to service 7B, the data supplied from operating branch 19 (Newtownards)

For up to date operating branch codes please see supplied excel sheet.

Integer	LineDIVA Char(11)	LineE
19659		
19659		
19659		
19659		
19659		

Notes:

- Routes with LineDIVA attribution containing the character 'Z' can be ignored as these are duplicates created for internal purposes. The core services will remain when these are omitted.
