DYVERT

Product Catalog

Our Mission

To enable the circular economy by providing waste messaging that is accessible, effective, and easy to implement.

What We Believe

Dyvert believes recycling and composting should be simple. Our patented waste collection systems provide a customizable and adaptable way for institutions, businesses, and venues to improve their waste programs, meet sustainability goals, and create happy users.

A Message From the Founder

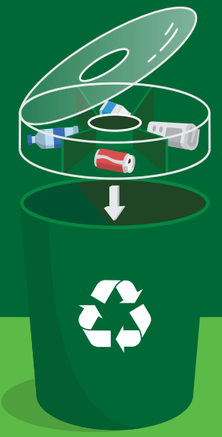

Recycling has taken numerous body blows in recent years. The list is long, but it includes the inexorable increase of disposables, challenging commodity markets, media hit pieces declaring recycling a "sham", and a loss of confidence from the public in waste diversion systems. As always, those in facilities planning and operations must keep up, despite the obstacles.

At Dyvert, we understand that though waste diversion systems can be overwhelmingly complex, it is our duty to make it as simple as possible to users. Our products are designed to make it easy to convey what should be disposed of in what stream, but also to build confidence in diversion systems. We aim to bridge the divide between your program and the users who rely on it. Recycling, composting, and waste minimization are real. **Let's show it.**

Ben Ditzler
Founder and owner of Dyvert

Make Recycling Obvious.

- **CUTS** Contamination in half
- **INCREASES** Diversion
- **REDUCES** Load rejections
- **ENGAGES** Users

ADAPTABLE

- For all waste configurations
- Customizable with site-specific materials
- Easy setup & updating

BETTER FACILITIES

- Engages users
