# Areas of intervention (1/3)

## International cooperation

CESAL sees development mainly as a trigger for the development of a person in its totality. Thus, we act in education, health, food security and nutrition, environment, sustainability, habitability, urban development and spatial planning, water and sanitation, local economic development, training for employment, among others.

## Emergency and humanitarian action

CESAL intervenes in emergency situations in those countries where we are present. We work in disaster prevention and mitigation. We support people both at the moment of the catastrophe, as in the later stages of rehabilitation.

## Awareness

The activity of sensitization is closely linked with the educational purpose that forms part of CESAL philosophy, therefore it promotes cultural and awareness activities fundamentally in Spain.

The aim is to favor the approach and participation of people to the problems of development and solidarity.

# Areas of intervention (3/3)

## Social security in Spain

Since 2007, CESAL has run the Dominican Immigrant Participation and Integration Center. The initial objective was to contribute to the full insertion of this collective. Given the current situation, our center has been converted into a space that caters to all sorts of people in danger of social exclusion. The Center offers diverse services to children, youngsters and adults.

## Employment and social enterprise

For CESAL, the work on the employability is a priority. Working with the most vulnerable people that end up redeeming their value, rediscovering their identity, their dignity and their own abilities. The goal is that technical and human training allows them to face their future with confidence. Through a learning-by-doing methodology, it provides training in professional, social and human skills, essential for job insertion and daily life.
