

NEW YORK CHEESECAKE

A classic New York Style Cheesecake. Delicious on its own or paired with fresh berries. You'll want a full slice to yourself, trust us.

- 1) Place Cheesecake in the center of the plate and garnish with your choice of toppings. Fresh berries or fruit compote with whipped cream is our favourite!

THAWING WHOLE CHEESECAKES:

- 1) Cheesecake will need approximately 24 hours to thaw.
- 2) Open the box and cut away the plastic wrap. Each piece is separated by paper.
- 3) Using a pie lifter or similar utensil, remove desired number of pieces and place onto a plate. Place a piece of plastic wrap over the slices of cheesecake and cover gently to prevent drying out. Place in the fridge overnight.
- 4) Return remaining frozen cheesecake to the freezer for later consumption.
- 5) After approximately 24 hours, check to see if cheesecake is thawed. If so, enjoy with fresh berries, berry sauce, or jams!
