From the Glenmoor Trail HOA

Hurricane Recovery & Community Update 1

October 17, 2026

Dear Glenmoor Trail Neighbors,

Following the recent hurricane, the Glenmoor Trail HOA Board is working to assess damage, address safety concerns, and coordinate cleanup and repairs throughout our community. We understand that recovery takes time, and we want to keep everyone informed about the steps being taken on behalf of our neighborhood.

What the HOA Is Doing

Cleanup and Tree Removal

- Patrick's landscaping company has cut down the trees at the entrance.
- Contacted tree removal and cleanup contractors to obtain estimates for storm-related debris removal and cleanup for the common area located near entrance and trail.
- Notified Escambia County regarding the fallen tree outside our community entrance.

Retention Pond and Fence Repairs

- Notified Escambia County regarding the retention pond and storm-related concerns.
- Contacting fence companies to obtain estimates for repairs to the fence surrounding the retention pond.

Insurance and Financial Planning

- Initiated an insurance claim to address damage resulting from the hurricane.
- Once all estimates have been submitted, review the necessary repairs and associated costs to help determine priorities and plan responsibly for expenses.

Trail Safety and Repairs

- Temporarily closed the community trail until cleanup can be completed.
- For your safety, please stay off the community trail while it remains closed.
- Assessing the trail and surrounding areas to determine what cleanup and repairs may be needed before reopening.

Streetlights

- FPL's website is not accepting reports regarding broken lights as efforts are focused on restoring power. Check the FPL website for further updates.

What Happens Next?

The Board is gathering contractor estimates, working with Escambia County on reported concerns, and coordinating with the insurance company regarding storm damage. Once additional information and estimates are available, the Board will be better positioned to determine the next steps and establish priorities for repairs.

Moving Forward Together

Our goal is to restore our community as safely and responsibly as possible while being mindful of HOA funds and the needs of our homeowners. We appreciate your patience as we work through the recovery process and will continue to provide updates as progress is made.

In addition, you do not need to submit for approval on repairs to damaged structures.

Thank you for your support and for being part of the Glenmoor Trail community. Please reach out with any questions.
