Notes:

1. These shingles are considered High End with respect to price and quality
2. These shingles are considered Mid-High End with respect to price and quality
3. These concrete tiles require an engineer's report to verify that the roof truss system will support the extra weight
4. These Impact Resistant Class-4 shingles qualify for a discount from most insurance companies; check with your insurer before purchasing

**When a homeowner selects a product from the approved material list automatic approval is granted.
However, an ARC request must still be submitted identifying which product is requested.**
