Tree Trim and Removal

While we have always taken pride in maintaining as much of the natural beauty of Discovery as possible, trees that have reached the end of their lives present a fire danger for our neighborhood. Additionally, your Board is conscious of the fact that we now have several very large, very old trees that are overcrowded and in some cases are too close to structures or walks or driveways, are precariously leaning, or are creating shading problems leading to icing in the winter.

If you have dead or dying trees on your property, or trees that present safety, structural or aesthetic concerns, we encourage you to take the initiative to remove them before they create further problems for you. However, **please work with our Architectural Review Committee (ARC) first!**

REMOVAL OF ANY LIVE SHRUB OR TREE REQUIRES PRIOR ARC APPROVAL.
ARC APPROVAL IS NOT REQUIRED BEFORE REMOVING ANY DEAD SHRUBS OR TREES.

ARC approval requests can be submitted via EasyHOA. All such requests will be handled expeditiously.

To drop off your yard waste for recycling contact Rocky Top Resources, 1755 E Las Vegas Street, (719) 579-9103. Be sure to check the hours of operations and fees.

There is no public dumping location for limbs and other yard waste associated with City Forestry.
