

City Forestry Offers Free Mulch

City Forestry offers free mulch to the public when they generate more than their parks use. The bin is first-come, first-serve, and you will need to bring your own loading tools. They don't guarantee mulch will be available, but their crews try to keep it filled throughout the year. To help provide a consistent supply for our private residents, use by commercial operations is prohibited. The mulch pile is across the street from the Forestry building at 1601 Recreation Way, on the west side of the street. FMI:
