

Hope Kids Home Water Tower Project

Thanks to the generous donation from Heritage of Faith Church on the Gold Coast Australia, we were able to construct a much-needed water tower, with a 5,000 litre tank.

The area where the home is located is often without power and as we relied on electric pumps to pump water from the wells to the building, no power meant no water.

The 5,000-litre water tank situated on top of the 9-meter tower will supply the home via gravity feed when the power is out.

Through the generosity of Heritage of Faith Church, we were also able to install a Solar Power system which includes solar panels, solar water pump, switch board, converter, security lights and batteries.

The project will not only give the home a constant water supply but will also reduce the electricity costs.

The Hope Kids Home and Give Kids Hope acknowledge and thank Heritage of Faith Church in Australia for the amazing gift.

Bless ya BIGGER,

Stephen & Sammy Darby.
