Introduction

This course fulfills the 2 hour continuing competency requirements for ethics, laws and regulations for physical therapist assistants practicing in the state of California. The Code of Ethics for the Physical Therapist (Code of Ethics) delineates the ethical obligations of all physical therapist and physical therapist assistants as determined by the House of Delegates of the American Physical Therapy Association (APTA). Regulations pursuant to the state of California will also be reviewed.

Instructor Biography

Michele S. Jang, PT is a course author for Flex Therapist CEUs; providing online continuing education units for physical therapists. She graduated with a degree in physical therapy from California State University, Long Beach. She is an experienced educator and currently manages a private physical therapy practice.

Licensure and Regulation

As members of a health care profession, and similar to other health care professions, physical therapists in the United States are licensed and regulated by the states. This information reviews the licensure status of physical therapists in all states and the District of Columbia, describes the purpose and requirements of state licensure, outlines licensing board structure, and provides information about terms and titles. Other than the information specifically about licensure of the physical therapist, the following information also applies to the physical therapist assistant. Information specific to physical therapist assistant licensure/regulation can be found in the section on physical therapist assistants.

State Licensure and Regulation

Physical therapists are licensed in all 50 states and the District of Columbia. State licensure is required in each state in which a physical therapist practices and must be renewed on a regular basis, with a majority of states requiring continuing education or some other continuing competency requirement for renewal. A physical therapist must practice within the scope of physical therapy practice defined by his or her state law governing the licensure and practice of physical therapy (often referred to as the “practice act”).

Purpose and Requirements for State Licensure

State licensure is inherently restrictive for the licensee and exclusive to the particular profession. Only those who “meet and maintain prescribed standards” established by the state’s regulatory board will, for the protection and benefit of the public, be allowed to profess their qualifications and provide their services to the public. The public is dependent upon the state to evaluate and affirm the

qualifications for licensure of physical therapists. One of the main tools used by a state's regulatory entity to determine if a physical therapist has met that threshold is the physical therapist's passage of the National Physical Therapy Exam (NPTE) of the Federation of State Boards of Physical Therapy (FSBPT). The NPTE is the only examination for licensure of physical therapists—all 50 states and the District of Columbia use it. The NPTE is "competency specific" and covers the entire scope of entry level practice, including theory, examination and evaluation, diagnosis, prognosis, treatment intervention, prevention, and consultation that are consistent with the exam blueprint. A formal, systematic process referred to as an "analysis of practice" determines the contents of a licensure examination. This process begins with the identification of work requirements for entry-level practitioners and ends with the development of a formal set of test specifications that delineates the knowledge and skills related to safe and effective entry-level practice.

Because physical therapy practice evolves, it is imperative that the licensure examinations be updated on an ongoing basis. Thus, a practice analysis must be conducted periodically to ensure that changes in entry-level requirements are incorporated into the licensure examinations. Revisiting the practice analysis regularly ensures that fewer test questions are included on skill areas of decreasing importance and more test questions address skill areas of increasing importance. The time frame for updating a practice analysis varies by profession; for the physical therapy profession this analysis is conducted at least every 5 years.

Another important qualification for licensure is graduation from an accredited physical therapy education program or a program that is deemed substantially equivalent. The Commission on Accreditation of Physical Therapy Education (CAPTE), recognized by the United States Department of Education as the specialized accrediting agency for physical therapy education programs, sets the quality threshold standards that physical therapist programs must meet in order to be accredited.

State Regulatory Boards

Most jurisdictions have independent state boards of physical therapy, but some jurisdictions' physical therapy boards are part of state medical boards or combined with other professions. There are also a few "super boards," under which all regulatory activities are subordinate to one board, with distinct committees or commissions for the various professions. Independent licensing boards are preferred because they provide the necessary expertise specifically for regulation of physical therapy practice. Most jurisdictions have licensing board members who are appointed by an elected official, usually the governor. Often they include 1 to 2 public members. Smaller jurisdictions may have fewer than 5 total board members, while larger ones have far greater numbers. When a state's practice act is silent on an issue or intervention, the determination of what constitutes practice "beyond the scope" of physical therapy is predominantly the responsibility of licensing board members. Scope of practice changes as contemporary practice evolves, and boards need the latitude to determine the

appropriateness of physical therapy procedures as they relate to both established and evolving scope of practice.

The Model Practice Act for Physical Therapy

Over decades the various physical therapy practice acts have contained functional and useful regulatory language but also some problematic language. Most jurisdictional practice acts had their origins in the 1950s and early 1960s, and amendments turned some practice acts into cobbled-together collections of regulatory language that are very diverse in their approach to the basic board responsibility of protecting the public and regulating the profession. FSBPT created *The Model Practice Act for Physical Therapy: A Tool for Public Protection and Legislative Change (MPA)* in 1997 as the preferred tool for revising and modernizing physical therapy practice acts. FSBPT encourages jurisdictions to review, improve, and strengthen practice acts, using the latest edition of the MPA as a resource. The continuing movement to update physical therapy practice acts helps ensure that they provide the legal authority to fully protect the public while effectively regulating the profession. The FSBPT task force that began developing the MPA in 1994 originally envisioned a model act that could be used cafeteria style to allow states to change a specific section of a practice act as needed. While the MPA can be used effectively in this manner, it also is a tightly constructed and integrated model for the regulation of physical therapy. The sections of the MPA complement each other—certain areas of the MPA are indispensable from others, and changes in one area might require modification of a state's practice act in other areas. The commentary sections of the MPA identify important cross-links in statute language. Since 1997 many states have enacted large portions of and, in some instances, nearly the entire Model Practice Act as their state statute.

Terms and Titles of the Physical Therapy Profession

State regulation restricts how licensees represent themselves, including their use of titles and/or letters, so that they do not mislead the public. For example, a medical or osteopathic physician practices and represents to the public that he or she practices medicine but not dentistry. When practitioners other than physical therapists represent that they are providing “physical therapy” or “physiotherapy,” they are violating the very spirit and core of licensure law by misrepresenting themselves to the public. A claim that “physical therapy” or “physiotherapy” is a generic term is misleading to the public. The protection of these terms is not referring to protection against the use of various physical agents, modalities, or procedures by others, but rather is against the inappropriate labeling of those modalities and procedures as physical therapy. In addition the title “PT” is the professional and regulatory designation that practice acts require physical therapists (and no others) in the United States to use to denote licensure. The use of the initials “DPT” by physical therapists indicates that they have obtained a doctoral degree in physical therapy (DPT). Use of the initials “DPT” should be used in conjunction with the licensure designation of “PT.”

Direct Access to Physical Therapist Services

The vast majority of U.S. jurisdictions have some form of patient access to evaluation and treatment by licensed physical therapists. Access to physical therapist services is critical to ensuring optimum patient functional status and independence. Throughout the experience of obtaining direct access at the state level, physical therapists have been questioned about their ability to identify a patient's signs and symptoms correctly, especially those that may represent cancer or other life-threatening conditions, if the patient has not first been screened by a physician. The misguided presumption is that physical therapists are not sufficiently educated or clinically trained to correctly diagnose an underlying pathological condition. This argument falsely concludes that direct access to physical therapists is therefore a threat to the safety of the public. However, a closer look at the facts and evidence proves otherwise.

Physical therapists diagnose impairments, functional limitations and disabilities related to medical conditions, movement dysfunction, and other health-related disorders. Physical therapists do not provide a medical diagnosis. However, they are well-prepared to identify when a patient's signs and symptoms potentially lie outside the scope of physical therapist diagnosis and require a referral to a physician for further diagnostic work-up and identification of underlying pathology. The examination process, routinely employed by physical therapists, ensures that direct access to physical therapists also allows referral to physicians when indicated. With more than 30 years of experience with direct access in the states that permit it, there is absolutely no evidence that physical therapists misinterpret a patient's signs and symptoms as non-pathological leading to serious injury or death. Physical therapist malpractice rates do not differ between states with patient direct access and those with a physician referral requirement. Furthermore, when the number of complaints against physical therapists filed with state licensure boards were examined prior to and after elimination of the physician referral requirement, no increase of complaints centered on patient harm was found. In the research study titled "Documentation of red flags by physical therapists for patients with low back pain," Leerar et al 1. studied the frequency of medical screening procedures in 6 private practice clinics. In this retrospective chart review of 160 patients admitted with low back pain, they found that an average of 8 out of the 11 recommended "red flag" screening questions were documented in the chart. The authors noted that this was comparable to or exceeded that of physicians in 5 other studies. In another study, Boissonnault et al 2. reported on 81 patients seen under direct access in a nonprofit, hospital-based outpatient department, and found that retrospective physician review of physical therapist management decisions determined that physical therapist decisions were appropriate 100% of the time. These decisions included making referrals for additional imaging studies, medical consultation, and medication for pain management. Most referrals from physicians are written as "evaluate and treat." Medical "diagnoses" may only be basket-terms such as "low back pain." Even if a specific medical diagnosis is provided along with an "evaluate and treat" referral, it is incumbent upon the physical therapist to identify the rehabilitation

diagnosis. Physical therapists independently design the plan of care and the schedule of implementation. It is the physical therapist who has ultimate responsibility for what interventions will be provided, how many times a week or month the patient will be seen, and the overall duration of the episode of care. Improved patient access does not harm or relationships between physical therapists and physicians. Direct access supports a collaborative model of practice between physicians and physical therapists and will create opportunities that can only enhance patient management, safety, and outcomes. Collaboration is, in many respects, the flip side of the direct access "coin." Historically, physical therapists emerged as a profession within the medical model, not as an alternative to medical care. Traditionally, physical therapists receive a substantial proportion of their clinical education and training in academic medical centers and hospitals, where team collaboration is paramount. Both physical therapists and physicians have a mutual respect for, and deep understanding of, their complementary roles in patient care. Direct access does not alter that relationship; it merely allows the collaboration to be initiated by the physical therapist at a point in the physical therapy episode of care that is most beneficial to the patient and most cost effective for the health care system.

California Physical Therapy Practice Act

Laws are created by statutes that originate from legislative bills originally introduced by either the Senate or the Assembly. In 1953 the Physical Therapy Practice Act (Act) was created. The Physical Therapy Practice Act begins with §2600 in the Business and Professions Code (B&P Code) and governs the practice of physical therapy. The Act, statutes, laws and B&P Code could be considered synonymous.

The California Physical Therapy Practice Act is available at:
<http://www.ptbc.ca.gov/laws/laws.shtml>

California Code of Regulations, Title 16 Division 13.2

Regulations are standards adopted as rules by the Physical Therapy Board of California to implement, interpret, or make specific the law enforced or administered by the Physical Therapy Practice Act. Regulations have the same effect as law. Failure to comply with either the laws or regulations could result in a citation and/or fine or discipline.

The California Code of Regulations is available at:
http://www.ptbc.ca.gov/laws_reg/regulations.shtml

Article 4. Physical Therapist Assistants

1398.44. Adequate Supervision Defined.

(a) "Adequate supervision" of a physical therapist assistant shall mean supervision that complies with this section. A physical therapist shall at all times be responsible for all physical therapy services provided by the physical therapist

assistant and shall ensure that the physical therapist assistant does not function autonomously. The physical therapist has a continuing responsibility to follow the progress of each patient, and is responsible for determining which elements of a treatment plan may be assigned to a physical therapist assistant.

(b) A physical therapist who performs the initial evaluation of a patient shall be the physical therapist of record for that patient. The physical therapist of record shall remain as such until a reassignment of that patient to another physical therapist of record has occurred. The physical therapist of record shall ensure that a written system of transfer to the succeeding physical therapist exists.

(c) The physical therapist of record shall provide supervision and direction to the physical therapist assistant in the treatment of patients to whom the physical therapist assistant is providing care. The physical therapist assistant shall be able to identify, and communicate with, the physical therapist of record at all times during the treatment of a patient.

(d) A physical therapist assistant shall not:

(1) Perform measurement, data collection or care prior to the evaluation of the patient by the physical therapist

(2) Document patient evaluation and reevaluation

(3) Write a discharge summary

(4) Establish or change a plan of care

(5) Write progress reports to another health care professional, as distinguished from daily chart notes

(6) Be the sole physical therapy representative in any meeting with other health care professionals where the patient's plan of care is assessed or may be modified.

(7) Supervise a physical therapy aide performing patient-related tasks

(8) Provide treatment if the physical therapist assistant holds a management position in the physical therapy business where the care is being provided. For purposes of this section, "management position" shall mean a position that has control or influence over scheduling, hiring, or firing.

The prohibitions in subsection (d) above shall not prohibit a physical therapist assistant from collecting and documenting data, administering standard tests, or taking measurements related to patient status.

(e) The physical therapist assistant shall:

(1) Notify the physical therapist of record, document in the patient record any change in the patient's condition not within the planned progress or treatment goals, and any change in the patient's general condition.

Article 6. Physical Therapy Aides

1399. Requirements for Use of Aides.

(a) A physical therapy aide is an unlicensed person who may be utilized by a physical therapist in his or her practice by performing non-patient related tasks, or by performing patient related tasks.

(b) Prior to the aide providing patient related care, a physical therapist shall evaluate and document, the aide's competency level for performing the patient related task that the aide will provide in that setting. The record of competencies

shall be made available to the board or any physical therapist utilizing that aide upon request.

(c) As used in these regulations:

(1) A "patient related task" means a physical therapy service rendered directly to the patient by an aide, excluding non-patient related tasks as defined below.

(2) A "non-patient related task" means a task related to observation of the patient, transport of patients, physical support only during gait or transfer, housekeeping duties, clerical duties and similar functions.

(3) "Under the orders, direction and immediate supervision" means:

(A) Prior to the initiation of care, the physical therapist shall evaluate every patient prior to the performance of any patient related tasks by the aide.

(B) The physical therapist shall formulate and record in the patient's record a treatment program based upon the evaluation and any other information available to the physical therapist, and shall determine those patient related tasks which may be assigned to an aide.

(C) The physical therapist shall assign only those patient related tasks that can be safely and effectively performed by the aide. The physical therapist shall be responsible at all times for the conduct of the aide while the aide is performing "patient related tasks" and "non-patient related tasks" as defined in this section.

(D) The physical therapist shall provide continuous and immediate supervision of the aide. The physical therapist shall be in the same facility as the aide and in immediate proximity to the location where the aide is performing patient related tasks. The physical therapist shall be readily available at all times to provide immediate advice, instruction or intervention in the care of the patient. When patient related tasks are provided to a patient by an aide the physical therapist shall at some point during the treatment day provide direct service to the patient as treatment for the patient's condition or to further evaluate and monitor the patient's progress.

(E) The physical therapist shall perform periodic re-evaluation of the patient as necessary and make adjustments in the patient's treatment program. The re-evaluation shall be documented in the patient's record.

Article 12. Topical Medications

1399.75. Compliance with Regulations.

A physical therapist may apply or administer topical medications to a patient as set forth in this article.

1399.76. Topical Medications Defined.

As used in this article "topical medications" means medications applied locally to the skin or underlying tissue where there is a break in or absence of the skin where such medications require a prescription or order under federal or state law.

1399.77. Administration of Medications.

Topical medications may be administered by a physical therapist by:

(a) Direct application;

- (b) Iontophoresis; or
- (c) Phonophoresis.

1399.78. Authorization and Protocols Required.

Topical medications shall be applied or administered by a physical therapist in accordance with this section.

(a) Any topical medication applied or administered shall be ordered on a specific or standing basis by a practitioner legally authorized to order or prescribe such medication.

(b) Written protocols shall be prepared for the administration or application of each of the groups of medications listed in Section 1399.79 for which a prescription is required under Federal or State law, which shall include a description of the medication, its actions, its indications and contraindications, and the proper procedure and technique for the application or administration of medication.

1399.79. Authorized Topical Medications.

A physical therapist may apply or administer those topical medications listed in this section in accordance with the provisions of this article:

- (a) Bacteriocidal agents;
- (b) Debriding agents;
- (c) Topical anesthetic agents;
- (d) Anti-inflammatory agents;
- (e) Antispasmodic agents; and
- (f) Adrenocortico-steroids.

Article 13. Continuing Competency Requirements

1399.91. Continuing Competency Required.

(a) As required by this article, a licensee must accumulate 30 hours of continuing competency hours in each license cycle. A licensee must submit evidence of completing those hours to the board in order to renew his or her license. In order to implement this requirement:

(1) For licenses that expire between October 31, 2010 and October 31, 2011, if the renewal is submitted prior to the expiration of the original license, 15 hours of continuing competency shall be completed.

(2) For licenses that expire on and after November 1, 2011, the full 30 hours shall be completed.

(b) For first-time license renewals, if the renewal is submitted prior to the expiration of the original license, the continuing competency hour requirements shall be one-half of the normal cycle. The requirements of 1399.93 shall apply to any renewal under this subsection.

(c) For those licensees accumulating "continuing education units" or "CEUs" under the continuing.

1399.92. Content Standards for Continuing Competency.

Continuing competency hours must be obtained in subjects related to either the professional practice of physical therapy or patient/client management.

(a) The professional practice of physical therapy includes but is not limited to professional accountability, professional behavior and professional development.

(b) Patient/client management includes but is not limited to examination, evaluation and diagnosis and prognosis; plan of care; implementation; education; and discharge.

1399.93. Continuing Competency Subject Matter Requirements

For each renewal cycle, a licensee's continuing competency hours must include the following:

(a) Two hours in ethics, laws and regulations, or some combination thereof, and

(b) Four hours in life support for health care professionals. Such training should be comparable to, or more advanced than, the American Heart Association's Basic Life Support Health Care Provider course.

1399.94. Authorized Pathways for Obtaining Hours.

Continuing competency hours must be obtained through an authorized pathway, which may be either traditional or alternate.

(a) Traditional pathways are those offered by an approved provider. There is no limit to the number of hours which may be accumulated through traditional pathways. The traditional pathways are:

1) continuing education courses, including home and self study courses, approved through an agency recognized by the board under the provisions of regulation section 1399.95; and

2) college coursework from an accredited institution.

(b) Alternate pathways are those offered by an entity other than an approved provider.

1399.97. Record Keeping.

(a) Each licensee shall keep and maintain records showing that each course or activity for which credit is claimed has been completed. Those records shall reflect the title of the course or activity, the date taken or completed, and the record of participation.

(b) Each licensee shall retain such documentation for a period of five years after the course or activity concludes.

(c) Each licensee shall provide copies of such documentation to the board or its designee upon request.

1399.98. Inactive Status.

(a) Upon written request, the board may grant inactive status to a licensee if, at the time of application for inactive status, the license is current and not suspended, revoked, or otherwise punitively restricted by the board.

(b) The licensee shall not engage in any activity for which a license is required.

(c) An inactive license shall be renewed during the same time period in which an active license or certificate is renewed. Any continuing education requirements for renewing a license are waived.

(d) The renewal fee for an inactive license is the same as the fee to renew an active license.

(e) To restore an inactive license to an active status, the holder shall do both of the following:

1) Pay the renewal and any continuing competency fees.

2) Complete continuing education equivalent to that required for a single renewal period of an active license within the last two years prior to applying to restore the license to active status.

(f) The inactive status of any licensee does not deprive the board of its authority to institute or continue any disciplinary or enforcement action against the licensee.

1399.99. Exemption from Continuing Competency Requirements.

At the time of applying for renewal of a license, a licensee may request an exemption from the continuing competency requirements. The request for exemption must provide the following information:

(a) Evidence that during the renewal period prior to the expiration of the license, the licensee was residing in another country for one year or longer, reasonably preventing completion of the continuing competency requirements; or

(b) Evidence that the licensee was absent from California because of military service for a period of one year or longer during the renewal period, preventing completion of the continuing competency requirements; or

(c) Evidence that the licensee should be exempt from the continuing competency requirements for reasons of health or other good cause which include:

1) Total physical and/or mental disability for one (1) year or more during the renewal period and the inability to work during this period has been verified by a licensed physician or surgeon or licensed clinical psychologist; or

2) Total physical and/or mental disability for one (1) year or longer of an immediate family member for whom the licensee had total responsibility, as verified by a licensed physician or surgeon or licensed clinical psychologist.

d) An exemption under this section shall not be granted for two consecutive renewal periods. In the event a licensee cannot complete continuing competency requirements following an exemption, the licensee may only renew the license in an inactive status.

The Standards of Ethical Conduct for the Physical Therapist Assistant

Preamble

The Standards of Ethical Conduct for the Physical Therapist Assistant (Standards of Ethical Conduct) delineate the ethical obligations of all physical therapist assistants as determined by the House of Delegates of the American

Physical Therapy Association (APTA). The Standards of Ethical Conduct provide a foundation for conduct to which all physical therapist assistants shall adhere. Fundamental to the Standards of Ethical Conduct is the special obligation of physical therapist assistants to enable patients/clients to achieve greater independence, health and wellness, and enhanced quality of life.

No document that delineates ethical standards can address every situation. Physical therapist assistants are encouraged to seek additional advice or consultation in instances where the guidance of the Code of Ethics may not be definitive.

Standard #1: Physical therapist assistants shall respect the inherent dignity, and rights, of all individuals.

1A. Physical therapist assistants shall act in a respectful manner toward each person regardless of age, gender, race, nationality, religion, ethnicity, social or economic status, sexual orientation, health condition, or disability.

1B. Physical therapist assistants shall recognize their personal biases and shall not discriminate against others in the provision of physical therapy services.

Standard #2: Physical therapist assistants shall be trustworthy and compassionate in addressing the rights and needs of patients/clients.

2A. Physical therapist assistants shall act in the best interests of patients/clients over the interests of the physical therapist assistant.

2B. Physical therapist assistants shall provide physical therapy interventions with compassionate and caring behaviors that incorporate the individual and cultural differences of patients/clients.

2C. Physical therapist assistants shall provide patients/clients with information regarding the interventions they provide.

2D. Physical therapist assistants shall protect confidential patient/client information and, in collaboration with the physical therapist, may disclose confidential information to appropriate authorities only when allowed or as required by law.

Standard #3: Physical therapist assistants shall make sound decisions in collaboration with the physical therapist and within the boundaries established by laws and regulations.

3A. Physical therapist assistants shall make objective decisions in the patient's/client's best interest in all practice settings.

3B. Physical therapist assistants shall be guided by information about best practice regarding physical therapy interventions.

3C. Physical therapist assistants shall make decisions based upon their level of competence and consistent with patient/client values.

3D. Physical therapist assistants shall not engage in conflicts of interest that interfere with making sound decisions.

3E. Physical therapist assistants shall provide physical therapy services under the direction and supervision of a physical therapist and shall communicate with the physical therapist when patient/client status requires modifications to the established plan of care.

Standard #4: Physical therapist assistants shall demonstrate integrity in their relationships with patients/clients, families, colleagues, students, other healthcare providers, employers, payers, and the public.

4A. Physical therapist assistants shall provide truthful, accurate, and relevant information and shall not make misleading representations.

4B. Physical therapist assistants shall not exploit persons over whom they have supervisory, evaluative or other authority (eg, patients/clients, students, supervisees, research participants, or employees).

4C. Physical therapist assistants shall discourage misconduct by healthcare professionals and report illegal or unethical acts to the relevant authority, when appropriate.

4D. Physical therapist assistants shall report suspected cases of abuse involving children or vulnerable adults to the supervising physical therapist and the appropriate authority, subject to law.

4E. Physical therapist assistants shall not engage in any sexual relationship with any of their patients/clients, supervisees, or students.

4F. Physical therapist assistants shall not harass anyone verbally, physically, emotionally, or sexually.

Standard #5: Physical therapist assistants shall fulfill their legal and ethical obligations.

5A. Physical therapist assistants shall comply with applicable local, state, and federal laws and regulations.

5B. Physical therapist assistants shall support the supervisory role of the physical therapist to ensure quality care and promote patient/client safety.

5C. Physical therapist assistants involved in research shall abide by accepted standards governing protection of research participants.

5D. Physical therapist assistants shall encourage colleagues with physical, psychological, or substance related impairments that may adversely impact their professional responsibilities to seek assistance or counsel.

5E. Physical therapist assistants who have knowledge that a colleague is unable to perform their professional responsibilities with reasonable skill and safety shall report this information to the appropriate authority.

Standard #6: Physical therapist assistants shall enhance their competence through the lifelong acquisition and refinement of knowledge, skills, and abilities.

6A. Physical therapist assistants shall achieve and maintain clinical competence.

6B. Physical therapist assistants shall engage in life-long learning consistent with changes in their roles and responsibilities and advances in the practice of physical therapy.

6C. Physical therapist assistants shall support practice environments that support career development and life-long learning.

Standard #7: Physical therapist assistants shall support organizational behaviors and business practices that benefit patients/clients and society.

7A. Physical therapist assistants shall promote work environments that support ethical and accountable decision-making.

7B. Physical therapist assistants shall not accept gifts or other considerations that influence or give an appearance of influencing their decisions.

7C. Physical therapist assistants shall fully disclose any financial interest they have in products or services that they recommend to patients/clients.

7D. Physical therapist assistants shall ensure that documentation for their interventions accurately reflects the nature and extent of the services provided.

7E. Physical therapist assistants shall refrain from employment arrangements, or other arrangements, that prevent physical therapist assistants from fulfilling ethical obligations to patients/clients.

Standard #8: Physical therapist assistants shall participate in efforts to meet the health needs of people locally, nationally, or globally.

8A. Physical therapist assistants shall support organizations that meet the health needs of people who are economically disadvantaged, uninsured, and underinsured.

8B. Physical therapist assistants shall advocate for people with impairments, activity limitations, participation restrictions, and disabilities in order to promote their participation in community and society.

8C. Physical therapist assistants shall be responsible stewards of healthcare resources by collaborating with physical therapists in order to avoid over-utilization or under-utilization of physical therapy services.

8D. Physical therapist assistants shall educate members of the public about the benefits of physical therapy.

APTA Guide for Conduct of the Physical Therapist Assistant

Purpose

This Guide for Conduct of the Physical Therapist Assistant (Guide) is intended to serve physical therapist assistants in interpreting the Standards of Ethical Conduct for the Physical Therapist Assistant (Standards) of the American Physical Therapy Association (APTA). The APTA House of Delegates in June of 2009 adopted the revised Standards, which became effective on July 1, 2010.

The Guide provides a framework by which physical therapist assistants may determine the propriety of their conduct. It is also intended to guide the development of physical therapist assistant students. The Standards and the Guide apply to all physical therapist assistants. These guidelines are subject to change as the dynamics of the profession change and as new patterns of health care delivery are developed and accepted by the professional community and the public.

Interpreting Ethical Standards

The interpretations expressed in this Guide reflect the opinions, decisions, and advice of the Ethics and Judicial Committee (EJC). The interpretations are set forth according to topic. These interpretations are intended to assist a physical therapist assistant in applying general ethical standards to specific situations. They address some but not all topics addressed in the Standards and should not be considered inclusive of all situations that could evolve. This Guide is subject to change, and the Ethics and Judicial Committee will monitor and timely revise the Guide to address additional topics and Standards when necessary and as needed.

Preamble to the Standards

The Preamble states as follows:

The Standards of Ethical Conduct for the Physical Therapist Assistant (Standards of Ethical Conduct) delineate the ethical obligations of all physical therapist assistants as determined by the House of Delegates of the American Physical Therapy Association (APTA). The Standards of Ethical Conduct provide a foundation for conduct to which all physical therapist assistants shall adhere. Fundamental to the Standards of Ethical Conduct is the special obligation of physical therapist assistants to enable patients/clients to achieve greater independence, health and wellness, and enhanced quality of life. No document that delineates ethical standards can address every situation. Physical therapist assistants are encouraged to seek additional advice or consultation in instances where the guidance of the Standards of Ethical Conduct may not be definitive.

Interpretation: Upon the Standards of Ethical Conduct for the Physical Therapist Assistant being amended effective July 1, 2010, all the lettered standards contain the word “shall” and are mandatory ethical obligations. The language contained in the Standards is intended to better explain and further clarify existing ethical obligations. These ethical obligations predate the revised Standards. Although various words have changed, many of the obligations are the same.

Consequently, the addition of the word “shall” serves to reinforce and clarify existing ethical obligations. A significant reason that the Standards were revised was to provide physical therapist assistants with a document that was clear enough such that they can read it standing alone without the need to seek extensive additional interpretation. The Preamble states that “[n]o document that delineates ethical standards can address every situation.” The Preamble also states that physical therapist assistants “are encouraged to seek additional advice or consultation in instances where the guidance of the Standards of Ethical Conduct may not be definitive.” Potential sources for advice or counsel include third parties and the myriad resources available on the APTA Web site. Inherent in a physical therapist assistant’s ethical decision-making process is the examination of his or her unique set of facts relative to the Standards.

Standards

Respect

Standard 1A states as follows:

1A. Physical therapist assistants shall act in a respectful manner toward each person regardless of age, gender, race, nationality, religion, ethnicity, social or economic status, sexual orientation, health condition, or disability.

Interpretation: Standard 1A addresses the display of respect toward others. Unfortunately, there is no universal consensus about what respect looks like in every situation. For example, direct eye contact is viewed as respectful and courteous in some cultures and inappropriate in others. It is up to the individual to assess the appropriateness of behavior in various situations.

Altruism

Standard 2A states as follows:

2A. Physical therapist assistants shall act in the best interests of patients/clients over the interests of the physical therapist assistant.

Interpretation: Standard 2A addresses acting in the best interest of patients/clients over the interests of the physical therapist assistant. Often this is done without thought, but sometimes, especially at the end of the day when the clinician is fatigued and ready to go home, it is a conscious decision. For example, the physical therapist assistant may need to make a decision between leaving on time and staying at work longer to see a patient who was 15 minutes late for an appointment.

Sound Decisions

Standard 3C states as follows:

3C. Physical therapist assistants shall make decisions based upon their level of competence and consistent with patient/client values.

Interpretation: To fulfill 3C, the physical therapist assistant must be knowledgeable about his or her legal scope of work as well as level of competence. As a physical therapist assistant gains experience and additional knowledge, there may be areas of physical therapy interventions in which he or she displays advanced skills. At the same time, other previously gained knowledge and skill may be lost due to lack of use. To make sound decisions, the physical therapist assistant must be able to self-reflect on his or her current level of competence.

Supervision

Standard 3E states as follows:

3E. Physical therapist assistants shall provide physical therapy services under the direction and supervision of a physical therapist and shall communicate with the physical therapist when patient/client status requires modifications to the established plan of care.

Interpretation: Standard 3E goes beyond simply stating that the physical therapist assistant operates under the supervision of the physical therapist. Although a physical therapist retains responsibility for the patient/client throughout the episode of care, this standard requires the physical therapist assistant to take action by communicating with the supervising physical therapist when changes in the patient/client status indicate that modifications to the plan of care may be needed. Further information on supervision via APTA policies and resources is available on the APTA Web site.

Integrity in Relationships

Standard 4 states as follows:

4. Physical therapist assistants shall demonstrate integrity in their relationships with patients/clients, families, colleagues, students, other health care providers, employers, payers, and the public.

Interpretation: Standard 4 addresses the need for integrity in relationships. This is not limited to relationships with patients/clients, but includes everyone physical therapist assistants come into contact with in the normal provision of physical therapy services. For example, demonstrating integrity could encompass working collaboratively with the health care team and taking responsibility for one's role as a member of that team.

Reporting

Standard 4C states as follows:

4C. Physical therapist assistants shall discourage misconduct by health care professionals and report illegal or unethical acts to the relevant authority, when appropriate.

Interpretation: When considering the application of “when appropriate” under Standard 4C, keep in mind that not all allegedly illegal or unethical acts should be reported immediately to an agency/authority. The determination of when to do so depends upon each situation’s unique set of facts, applicable laws, regulations, and policies. Depending upon those facts, it might be appropriate to communicate with the individuals involved. Consider whether the action has been corrected, and in that case, not reporting may be the most appropriate action. Note, however, that when an agency/authority does examine a potential ethical issue, fact finding will be its first step. The determination of ethicality requires an understanding of all of the relevant facts, but may still be subject to interpretation. The EJC Opinion titled: Topic: Preserving Confidences; Physical Therapist’s Reporting Obligation With Respect to Unethical, Incompetent, or Illegal Acts provides further information on the complexities of reporting.

Exploitation

Standard 4E states as follows:

4E. Physical therapist assistants shall not engage in any sexual relationship with any of their patients/clients, supervisees, or students.

Interpretation: The statement is fairly clear – sexual relationships with their patients/clients, supervisees or students are prohibited. This component of Standard 4 is consistent with Standard 4B, which states:

4B. Physical therapist assistants shall not exploit persons over whom they have supervisory, evaluative or other authority (eg, patients/clients, students, supervisees, research participants, or employees).

Next, consider this excerpt from the EJC Opinion titled Topic: Sexual Relationships With Patients/Former Patients (modified for physical therapist assistants):

A physical therapist [assistant] stands in a relationship of trust to each patient and has an ethical obligation to act in the patient’s best interest and to avoid any exploitation or abuse of the patient. Thus, if a physical therapist [assistant] has natural feelings of attraction toward a patient, he/she must sublimate those feelings in order to avoid sexual exploitation of the patient. One’s ethical decision making process should focus on whether the patient/client, supervisee or student is being exploited. In this context, questions have been asked about whether one can have a sexual relationship once the patient/client relationship ends. To this question, the EJC has opined as follows: The Committee does not believe it feasible to establish any bright-line rule for when, if ever, initiation of a romantic/sexual relationship with a former patient would be ethically permissible. The Committee imagines that in some cases a romantic/sexual relationship

would not offend ... if initiated with a former patient soon after the termination of treatment, while in others such a relationship might never be appropriate.

Colleague Impairment

Standard 5D and 5E state as follows:

5D. Physical therapist assistants shall encourage colleagues with physical, psychological, or substance-related impairments that may adversely impact their professional responsibilities to seek assistance or counsel.

5E. Physical therapist assistants who have knowledge that a colleague is unable to perform their professional responsibilities with reasonable skill and safety shall report this information to the appropriate authority.

Interpretation: The central tenet of Standard 5D and 5E is that inaction is not an option for a physical therapist assistant when faced with the circumstances described. Standard 5D states that a physical therapist assistant shall encourage colleagues to seek assistance or counsel while Standard 5E addresses reporting information to the appropriate authority.

5D and 5E both require a factual determination on the physical therapist assistant's part. This may be challenging in the sense that you might not know or it might be difficult for you to determine whether someone in fact has a physical, psychological, or substance-related impairment. In addition, it might be difficult to determine whether such impairment may be adversely affecting someone's work responsibilities. Moreover, once you do make these determinations, the obligation under 5D centers not on reporting, but on encouraging the colleague to seek assistance. However, the obligation under 5E does focus on reporting. But note that 5E discusses reporting when a colleague is unable to perform, whereas 5D discusses encouraging colleagues to seek assistance when the impairment may adversely affect his or her professional responsibilities. So, 5D discusses something that may be affecting performance, whereas 5E addresses a situation in which someone is clearly unable to perform. The 2 situations are distinct. In addition, it is important to note that 5E does not mandate to whom you report; it gives you discretion to determine the appropriate authority. The EJC Opinion titled Topic: Preserving Confidences; Physical Therapist's Reporting Obligation With Respect to Unethical, Incompetent, or Illegal Acts provides further information on the complexities of reporting.

Clinical Competence

Standard 6A states as follows:

6A. Physical therapist assistants shall achieve and maintain clinical competence.

Interpretation: 6A should cause physical therapist assistants to reflect on their current level of clinical competence, to identify and address gaps in clinical

competence, and to commit to the maintenance of clinical competence throughout their career. The supervising physical therapist can be a valuable partner in identifying areas of knowledge and skill that the physical therapist assistant needs for clinical competence and to meet the needs of the individual physical therapist, which may vary according to areas of interest and expertise. Further, the physical therapist assistant may request that the physical therapist serve as a mentor to assist him or her in acquiring the needed knowledge and skills. Additional resources on Continuing Competence are available on the APTA Web site.

Lifelong Learning

Standard 6C states as follows:

6C. Physical therapist assistants shall support practice environments that support career development and lifelong learning.

Interpretation: 6C points out the physical therapist assistant's obligation to support an environment conducive to career development and learning. The essential idea here is that the physical therapist assistant encourage and contribute to the career development and lifelong learning of himself or herself and others, whether or not the employer provides support.

Organizational and Business Practices

Standard 7 states as follows:

7. Physical therapist assistants shall support organizational behaviors and business practices that benefit patients/clients and society.

Interpretation: Standard 7 reflects a shift in the Standards. One criticism of the former version was that it addressed primarily face-to-face clinical practice settings. Accordingly, Standard 7 addresses ethical obligations in organizational and business practices on a patient/client and societal level.

Documenting Interventions

Standard 7D states as follows:

7D. Physical therapist assistants shall ensure that documentation for their interventions accurately reflects the nature and extent of the services provided.

Interpretation: 7D addresses the need for physical therapist assistants to make sure that they thoroughly and accurately document the interventions they provide to patients/clients and document related data collected from the patient/client. The focus of this Standard is on ensuring documentation of the services rendered, including the nature and extent of such services.

Support - Health Needs

Standard 8A states as follows:

8A. Physical therapist assistants shall support organizations that meet the health needs of people who are economically disadvantaged, uninsured, and underinsured.

Interpretation: 8A addresses the issue of support for those least likely to be able to afford physical therapy services. The Standard does not specify the type of support that is required. Physical therapist assistants may express support through volunteerism, financial contributions, advocacy, education, or simply promoting their work in conversations with colleagues. When providing such services, including pro bono services, physical therapist assistants must comply with applicable laws, and as such work under the direction and supervision of a physical therapist. Additional resources on pro bono physical therapy services are available on the APTA Web site.
