BEF (Better-Easier-Faster) in Digital Esthetic & Functional Treatment Planning

3day theoretical & practical program

by

Dr. Didier DIETSCHI, D.M.D, PhD, Privat-Docent

Dr. Massimo SARATTI, D.M.D

**UNIVERSITÉ
DE GENÈVE**

The Geneva Smile Center

Day 1:

Lecture:

General principles and aims in esthetic and functional treatment planning
The evolution from analog to digital workflows
Digital workflow and its clinical implications
Innovative softwares for esthetic treatment planning

Hands-on:

2D templates (Key Note & Power Point)
2D esthetic & treatment planning softwares
Virtual reality esthetic software
3D esthetic & treatment planning software (demo)

Day 2:

Lecture:

Digital treatment planning for full mouth rehabilitation
Digital treatment planning for complex tooth wear
Materials in Digital dentistry (restorative, temporary, mockup; 3D printed solutions)

Hands-on:

Digital impression: basic functions
Impression for anterior and posterior restorations (with rubber dam)
Mockup techniques (snap-on and classical protocols)

Day 3:

Lecture:

Equipment choice: camera, lens, flash, accessories, soft boxes, retractors, contrastors
Camera and Flash settings (for Nikon & Canon)
Protocols for extra-oral & intra-oral shooting
Basic Image handling and retouching (Power Point, Keynote, Photoshop) (live demo)

Hands-on: mastering form & texture

Setting-up participant cameras
Portrait photography
Intra-oral photography

Course Conclusions
