

Working Student - IT Support & Web Development (fully Remote)

About alphalist

alphalist is an exclusive community for CTOs, VPs of Engineering, and other technical leaders, providing a trusted network for knowledge exchange, networking, and staying ahead of the curve in the tech industry. Through our community platform, events, and the popular alphalist.CTO Podcast, we support leaders in tackling their challenges and building the future of technology.

What we are looking for

Tech Stack: Nuxt 3, TypeScript, Node.js & AI Integration

Are you looking for a role where "support" means more than just resetting passwords? We are looking for a tech-savvy student to help us maintain and evolve our modern web ecosystem, internal bots, and automated workflows.

The Role

- **Web Development:** Support the maintenance and feature-building of our web platforms using **Vue 3 / Nuxt 3**.
 - **Integrations & Bots:** Help manage our internal tooling, including **Slack bots** (@slack/bolt), **Airtable** workflows, and **Stripe** payment flows.
 - **Monitoring:** Use **Sentry** to track down bugs and ensure high performance across our applications.
 - **Infrastructure & Content:** Work with **PostgreSQL (Neon DB)**, **AWS S3**, and manage content via **Storyblok CMS**.
 - **AI Implementation:** Assist in implementing and testing AI features using the **Anthropic/Claude SDK**.
-

Your Profile

The Essentials (Web & Bots):

- **Frontend:** Proficiency in **Vue 3 / Nuxt 3**, **TypeScript**, and **Tailwind CSS**.
- **Backend:** Solid understanding of **Node.js** (v20/22) and experience with **REST APIs**.
- **Database & Auth:** Familiarity with **PostgreSQL** and authentication patterns (e.g., **Auth.js**).
- **Version Control:** You are comfortable using **Git** in a team environment.
- **Problem Solver:** You enjoy troubleshooting and connecting different third-party services.

Bonus Points:

- Experience with **Laravel / PHP** (to help us maintain our legacy site).
-

What's In It For You?

- **Cutting-Edge Stack:** Work with the latest versions of Nuxt, Node, and AI SDKs—no ancient tech debt here.
 - **Real Impact:** Your work on automation and bots will directly improve our daily operations.
 - **Flexibility:** We prioritize your studies; enjoy flexible working hours and remote-friendly options.
 - **Growth:** Gain hands-on experience in a professional CI/CD environment and AI integration.
-

What else do we expect from you?

- Currently enrolled in a relevant Bachelor's or Master's program.
- **Excellent communication skills** and a proactive, engaging personality.
- A high degree of **independence and self-motivation** - you enjoy taking ownership and structuring your own work.
- **Language Skills:** Very proficient in English (**C1/C2 level**), written and spoken. Fluent in German is a plus..

We Offer

- A flexible, fully remote position (work from anywhere!).
- A commitment of **20 hours / week**, allowing you to balance work and studies effectively.
- **17,50 € / hour**
- The opportunity to work independently and take on responsibility from day one.
- Deep insights into the operations of an exclusive, high-level tech community.
- A dynamic, supportive, and completely remote team culture.

Ready to join the list?

If you are eager to contribute your skills to a growing tech community and thrive in an independent, remote environment, we would love to hear from you!

Please send your application (CV and a brief motivation) to sebastian@alphalist.com
