RS Stock No.: xxx-xxxx

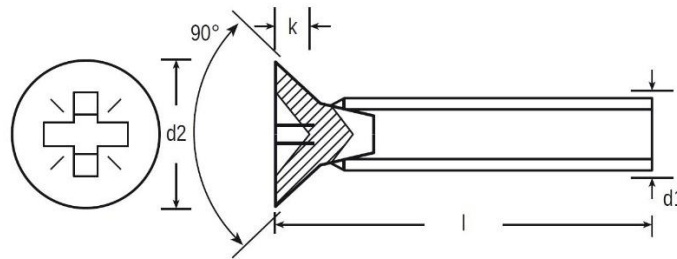

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Family Name

Product Description

Machine screws are designed to join component parts together and are fitted to a pre-drilled and tapped hole, or nut. Example applications include machinery, engines, manufacturing, industrial equipment, maintenance, and repair. These have a cross recessed drive, and the countersunk head gives a flush finish once in place. Stainless steel offers great resistance to corrosion and is ideal for external applications; being A4 grade, these machine screws can also be used in marine environments.
