RS Pro Cable Marker

Product Details

Marker Plates

White nylon marker plates in six different sizes. These plates have a unique design with round holes instead of slots which allow the plates to be mounted vertically or horizontally, so that they can be used as tags, flags, or wrap-around identification plates. They can be marked with nylon marking pens, hot stamped, or in a marking machine. Cable ties $\leq 4.8\text{mm}$ width may be used – see RS Stock Nos. 178-484 and 178-478

Specifications:

Affixing Method	Tie
Length	50.5mm
Width	19 mm
Quantity	100
Material	Nylon 66
