## RS PRO INDUSTRIAL LAYFLAT HOSE ASSEMBLIES

Stock number: See Table

EN

A general purpose hose that offers exceptional value for money. For use on the discharge side of water pumps in drainage and irrigation, and for also conveying non solvent based liquids. Can be also suitable for spreading liquid fertilisers, agricultural chemicals, and some mild abrasive powders.

### Key Features

- Compact in design.
- Made from Cadmium free materials.
- Resistant to a wide range of chemicals.
- Silicone-free.
- Good resistance to abrasion.
- Provides good flexibility.
- Minimum electrical conductivity.
- Tough and durable for longer lifespan.
- Fast liquid transfer.
- Nominal 3 Bar working pressure (Light duty)
- Easy to store and transport.

### Application examples:

- Drainage, water supply, irrigation and sprinkler systems
- Chemical transfer
- Agricultural chemicals

There are two main types of fixings we offer as part of our assemblies: Camlock and Leverlock Couplings.

### Camlock:

Camlocks are a quick connect coupling used in most industries as a hose connection to avoid leakages. They offer a quick, simple and economical way of re-connecting and disconnecting hoses. They are particularly useful where rapid filling of vessels takes place.

### Leverlock:

Leverlock couplings offer a quick and simple way to join many lengths of hose together. They are often used for the pumping and transfer of water in the construction, road maintenance and general irrigation industries. They are also ideal for loading and unloading road tankers.

Leverlock couplings Male / Female			Camlock Couplings Male / Female
