

Datasheet

10 Piece Punch Set Wad

Features

- Supplied as a set of punches and handle in a plastic presentation kit.
- The kit consists of the wad punch handle onto which any one of the interchangeable cutting heads can be fixed.
- The handle can be struck with a hammer or mallet using a wooden block, preferably end grain, as an anvil.
- The spring-loaded plunger in the handle is used to centre the punch and to eject the slug. Fully heat-treated and chemically blackened.
