

FEATURES

- Thread Forming Screw
- Length of 9 mm
- Conforms to UTS (Unified Thread Standard) No. 4
- Steel construction with BZP (bright zinc-plated) finish
- Pan head screws, for use in high torque metal and wood applications
- Supplied in bags of 100

RS PRO Bright Zinc Plated Steel Pan Head Thread Forming Screw, N°6 x 9mm Long

RS Stock No.: 482-8076

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

If you only have access to one side of a material that needs to be joined to another piece of material, this thread forming screw from the RS PRO series is a suitable choice. A practical option for the disassembly and reassembly of furniture, this pan-headed screw is particularly suitable for high-torque applications in metal or wood where countersinking could be an issue. As the screw forms its own holes, all you need to do is make a small pilot hole in the surface, put the screw over the hole and then drill it into place with the suitable driver.

General Specifications

Head Shape	Pan
Drive Type	Cross
Finish	Bright Zinc Plated
Material	Steel
Thread Size (UTS)	6
Application	Frequently used in the automotive world

Mechanical Specifications

Length Metric	9mm
