RS PRO ESD Wash Bottle 8oz

Stock No: 184-6689

Technical Specifications:

Description:

Our bottles have been produced using a new process utilising a concentrate that does not contain any Exthoxylated Tertiary Amine, which is widely used as an antistatic agent. These ESD safe bottles have an average surface resistivity of 10^9 to 10^{10} Ohms / square and do not have any less desirable features associated with surfactant-laden material.

These bottles will dissipate a static charge of $\pm 5000V$ in less than two seconds at 40% relative humidity. By their chemical nature, they will not have any chemical reactivity with solvents such as TCE or alcohol. The pH of the deionised water solutions tested were the same before and after a seven day period. No colour change or any other physical change was noted for any solvents tested.

Features:

- 8oz Bottles
- Non greasy
- Cleanroom safe
- Static Free
- No Tertiary Amines
- Humidity Independent
- Average Surface Resistivity of 10^9 to 10^{10} Ohms / Square
- Helps to meet ANSI/ESD S-20.20
