

Datasheet Scaffold Ring Bolts

ENGLISH

Features

Scaffold Ring Bolts are used together with M16 Drop In Anchors or M16 Internal Threaded Sockets installed with Spin In Glass Capsules or Injection Resin.

Range Data

RS Stock No	Thread Diam	Eye Diameter	Overall Length	Maximum Load
	mm	mm	mm	kg
1776905	16	53	210	1270

Test Loads

Test Number	Proof Load	Remarks
	kN	
K406	25.0	After a proof Load of 25kN had been applied and released the Scaffold Ring Bolt showed no signs of deformation
K407	25.0	After a proof Load of 25kN had been applied and released the Scaffold Ring Bolt showed no signs of deformation

Scaffold Ring Bolts are only to be used for scaffold restrains and loaded in tension and must be installed to ensure they are not subjected to shear loading. They are not to be used for safety harness anchorage points or as lifting eyes.
