RS Pro Rope Pull Kit, For Use With All Rope Pull Switches

RS Stock No: **239-6763**

Product Details

RS Pro rope pull kit is suitable for use with all rope pull switches. The kit includes all fittings and fixtures required to install any rope pull switch, including hazardous area versions. All the contents has stainless steel grade 316 construction. It has a 10 m cable made of multi strand galvanised steel and covered with PVC. Two thimbles, collar clamps and "D" shackles are provided for securing each end of the grab wire to the safety switch.

Features and Benefits

- Stainless steel tensioner provided for switches that do not have this feature built in
- Sufficient M6 eyebolts with locking nuts are provided to support the wire at approximately 2 to 3 m intervals
- First and last supports should be placed no more than 300 mm from the end of the switch to ensure that the pull on the switch is linear
- Vital for correct operation to ensure that the wire is free running when pulled
- Rope may be cut to any suitable required length
