

Datasheet

Type E - French 5 Gang DC Power Socket 2.5m Cable, 16A, 230 V ac

RS Stock 755-3983

Specification:

- Socket type : NFC61-314 (socket 2)
- Socket quantity : 5
- Cable specification : Cable HO5VVF 3G 1.5 with DIN 49441 16 Plug, 2.5M
- Rating voltage : 230VAC 50/60Hz
- Max. Power : 16A, 3680W
- Product size : LxWxH = 482.6 x 44.4 x 46.5 mm
- Control Function : lightning protection with single power indicator
- Vertical and horizontal mounting
- RoHS

Series Connection: Several combinations of positive and negative power rails, such as $\pm 5V$, $\pm 12V$ etc., may be obtained, at currents up to the rated limit, by connecting the positive terminal of one output to the negative terminal of the other output with the junction being at '0V'.

Parallel Connection: Current may be increased by connecting the two outputs in parallel (positive to positive and negative to negative).
