Packed Weight and Dimensions

RS Code	Manufacturers Code	Description	Weight g	W mm	H mm	L mm
7857894	51-550-012	Universal Bevel Protractor	635	107	34	310

**Method:**

Insert the required size blade and clamp in position
Unlock the central locking screw and rotate the blade to the required angular position
Lock the protractor

Example Protractor position shown left

Example of Vernier Reading shown below

Zero line on fixed scale shows $43^{\circ} + ?$

Fifth graduation line on fixed scale lines up with line on rotating scale

Angle = $43^{\circ} + 5 \times 5$ minutes

Total Angle Setting = $43^{\circ} - 25'$
