## RS PRO DVI-D to SVGA Converter (DVI-D Source), Black

Stock number: 2299958

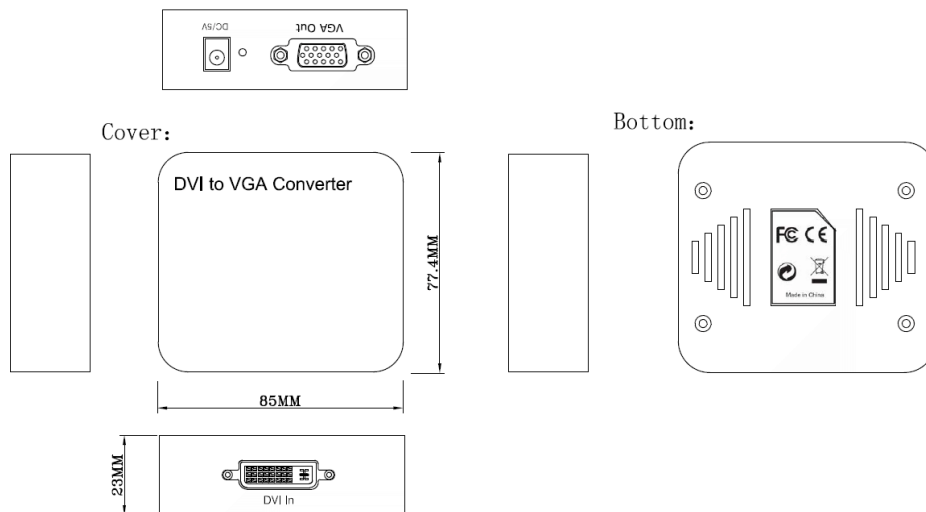

EN

The RS PRO DVI-D to SVGA converter has a black ABS shell and metal connectors which are nickel. Our converter converts a DVI-D (digital) signal in to an SVGA (analogue) signal and supports resolutions up to 1080p.

DVI-D is a digital only connection and cannot be used with a VGA monitor unless it is actively converted to an analogue signal.

DVI-I can carry either digital or analogue signal, the graphics cards controls the signal type.

DVI-D and DVI-I are also split into two types of cable, dual link and single link. Dual link has all the pins connected to achieve higher resolutions whereas single link may have the physical pins present but some will not be connected inside the cable.
