

'Log20' Data Logger for Temperature/Humidity Model: 31.1052

- * Large display for actual measurement and MAX/MIN/AVG value
- * Battery status indicator
- * Easy to use Windows Software (LOG-Graph)
- * Optical HI/LO alarm
- * Memory for 20.000 readings with 3 variables
- * Adjustable interval from 30 seconds to 24 hours
- * Easy changeable battery
- * High accuracy + - 0,5°C / +- 3% rH

Technical Data

Measuring range:	-30...+60°C / 0...100% RH
Accuracy:	±0,5°C(-20..+50°C), other-wise ±0,7°C / ± 3% RH
Memory:	2 x 20.000 measurements
Inter-face:	USB
Voltage:	1 x CR2032
Battery life:	> 1 Year (measuring interval > 4 minutes)
Dimensions:	88 x 55 x 20 mm
Weight:	95 g

***DE-Graph Windows software sold separately (Item No. 31.1041)**

Windows software with USB cable for programming and reading out the data logger, equipment
