ANALOGUE TEMPERATURE CONTROLLER

Analogue Set, Analog Temperature Controller

- J type Thermocouple Input or,

K type Thermocouple Input or,

R type Thermocouple Input or,

S type Thermocouple Input or.

2 or 3-wire PT 100 Input (It must be determined in order)

ON/OFF Operation

Hysteresis value configurable with Jumper

(It must be determined in order)

ES Analogue Temperature Controllers are designed for measuring and controlling temperature. They can be used in many applications with their simple and easy to use properties, On / Off and time proportional control form. They are mainly used in glass, plastic, petro-chemistry, textile, automotive and machine production industries.

SPECIFICATIONS

INPUT

Thermocouple(TC): J, K,R,S (IEC 584.1) (ITS90)

Thermoresistance(RTD): 2 or 3-wire Pt100 (IEC 751)(ITS90)

Measurement Range: It is in ordering information

Accuracy: ± 1% of full scale

Cold Junction Compensation: Automatically ±0.1°C/1°C Sensor Break Protection: Upscale

Sampling Cycle: 3 samples per second

CONTROL

Control Form: ON/OFF.

ON/OFF Hysteresis: It can be adjust %1 or %2 of full scale with JUMPER.

OUTPUT

Control Output: Relay(5A@250V at resistive load)

SETTINGS

Resolution of Set Point: ± %0.2 of full scale

Accuracy of Set Point: ± %1 of full scale

DISPLAY

LED Indicators : PWR(Green), Out(Red)

POWER SUPPLY

Power Supply Voltage :

230 V ~ (±%15)50/60 Hz 4VA

115 V ~ (±%15) 50/60 Hz 4VA

24 V ~ (±%15) 50/60 Hz 4VA

(It must be determined in order.)

ENVIRONMENTAL RATINGS and PHYSICAL SPECIFICATIONS:

Operating Temperature: 0...50°C Humidity: 0-90%RH (none condensing) Protection Class: IP65 at front, IP20 at rear

Weight:

72 x 72 : 300gr. 96 x 96 : 400gr.

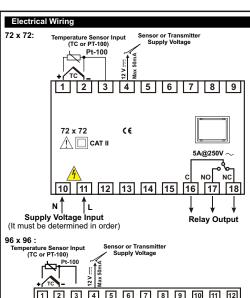

Dimensions:

72 x 72mm, Depth: 104 mm

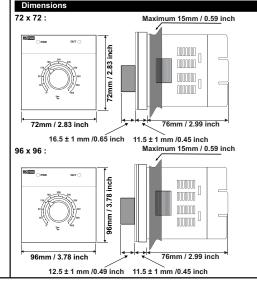

96 x 96mm.Depth:100 mm

Panel Cut-Out:

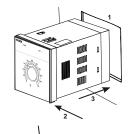

72 x 72 : (69 x 69 mm) 96 x 96 : (92 x 92 mm)

Panel Mounting

MIL

Panel Cut-out

72 x 72:

2.72

1-Before mounting the device in your panel, make sure that the cutout is of the right size.

2-Check front panel gasket

3-Insert the device through the cutout. If the mounting clamps are on the unit, put out them before inserting the unit to the panel.

4-Insert the unit in the panel cut-out from the front side.

5- Insert the mounting clamps to the holes that located top and bottom sides of device and screw up the fixing screws until the unit completely immobile within the nanel

Potentiometer for Adjustment **Operation Settings**

Front Panel Definetion

Led indication of device

is active

Set value can be adjusted with Set Value Adjustment Potentiometer that is on the front panel. Set value range changes according to the type and scale of the device. Minimum and maximum values of Set value according to the device type are given below:

of Set Value

Led indication of Control

Outputs Status

Scale changes

according to the

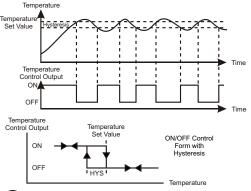

type and scale of the device

Set Values according to the Type and Scale of the Device

For PT-100 (-100.0 to 100.0)°C
For PT-100 (0.0 to 200.0)°C
For PT-100 (0 to 400)°C
For J Type TC (0 to 400)°C
For J Type TC (0 to 800)°C
For K Type TC (0 to 1200)°C
For R Type TC (0 to 1600)°C
For S Type TC (0 to 1600)°C

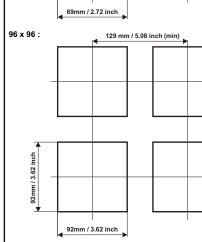

Adjustment of Hysteresis Value for ON/OFF Control

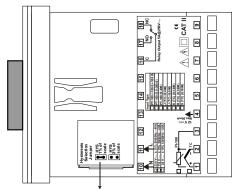

In ON/OFF control algorithm, temperature value is tried to keep equal to set value by opening or closing completely last control element. ON/OFF controlled system, temperature value oscillates continuously. Temperature value's oscillation period or amplitude around set value changes according to controlled system. For reducing oscillation period of temperature value, a threshold zone is formed below or around set value and this zone is named hysteresis. Action of control output is described with figures below.

In operation with ON/OFF Control form; hysteresis value can be adjusted with Jumper on the device. (It must be determined in order)

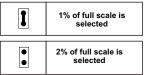

Introduction Brochure, ENG ES-xx50 01 V00 12/12

Jumper is under cover and cover is on top side of the device

Hysterisis Value Selection

Minimum and maximum value of hysteresis according to the type and scale of the device are given below:

Input Type	Jumper Selection	
	%1.0	%2.0
For PT-100 (-100.0 to 100.0)°C :	2.0°C	4.0°C
For PT-100 (0.0 to 200.0)°C :	2.0°C	4.0°C
For PT-100 (0 to 400)°C :	4.0°C	8.0°C
For J Type TC (0 to 400)°C:	4.0°C	8.0°C
For J Type TC (0 to 800)°C:	8.0°C	16.0°C
For K Type TC (0 to 1200)°C :	12.0°C	24.0°C
For R Type TC (0 to 1600)°C:	16.0°C	32.0°C
For S Type TC (0 to 1600)°C:	16.0°C	32.0°C

Installation

Before beginning installation of this product, please read the instruction manual and warnings below carefully. In package.

- -One piece unit
- Two pieces mounting clamps
- One piece instruction manual

A visual inspection of this product for possible damage occured during shipment is recommended before installation. It is your responsibility to ensure that qualified mechanical and electrical technicians install this product.

If there is danger of serious accident resulting from a failure or defect in this unit, power off the system and separate the electrical connection of the device from the system.

The unit is normally supplied without a power switch or a fuse. Use power switch and fuse as required.

Be sure to use the rated power supply voltage to protect the unit against damage and to prevent failure.

Keep the power off until all of the wiring is completed so that electric shock and trouble with the unit can be prevented.

Never attempt to disassemble, modify or repair this unit. Tampering with the unit may results in malfunction, electric shock or fire

Installation

Do not use the unit in combustible or explosive gaseous atmospheres.

During the equipment is putted in hole on the metal panel while mechanical installation some metal burrs can cause injury on hands, you must be careful.

Montage of the product on a system must be done with it's own fixing clamps. Do not do the montage of the device with inappropriate fixing clamps. Be sure that device will not fall while doing the montage.

to in gits monage.

It is your responsibility if this equipment is used in a manner not specified in this instruction manual.

Warrant

Warrants that the equipment delivered is free from

defects in material and workmanship. This warranty is provided for a period of two years. The warranty period starts from the delivery date. This warranty is in force if duty and responsibilities which are determined in warranty document and instruction manual performs by the customer completely.

Maintenance

Repairs should only be performed by trained and specialized personnel. Cut power to the device before accessing internal parts.

Do not clean the case with hydrocarbon-based solvents (Petrol, Trichlorethylene etc.). Use of these solvents can reduce the mechanical reliability of the device. Use a cloth dampened in ethyl alcohol or water to clean the external plastic case.
