Schneider Electric

Harmony SCU
HMI controllers for simple machines with up to 16 Is/10 Os

Harmony SCU

Presentation

The ultra-compact range of Harmony SCU HMI controllers are part of Schneider Electric's Flexible Machine Control concept, a key element in MachineStruxure™.

The Harmony SCU HMI controllers offer brings together Human Machine Interface and control functions within in a single product. This reduces the amount of equipment required and the associated costs throughout the life cycle of the machine.

The Harmony SCU integrate, as standard, all their functions. They benefit, in particular, from the same innovation as the Harmony STU panels range: Mounting via a 22 mm diameter hole (pushbutton type) which considerably simplifies installation (see page 6).

Of modular design, this range comprises:
■ 2 complete Harmony SCU products for the control of simple machines, comprising:
□ A 3.5" or 5.7" 65 k color TFT Screen module
□ A Controller module with 16 integrated digital inputs/10 integrated digital outputs
■ 2 complete Harmony SCU products for the control of simple processes, comprising:
□ A 3.5" or 5.7" 65 k color TFT Screen module
□ A Controller module with 8 integrated digital inputs/8 integrated digital outputs and 4 integrated analog inputs/2 integrated analog outputs

The screen modules and Controller modules (for simple machines or processes) are also available separately as replacement parts. Harmony SCU operate with the same screen modules as Harmony STU panels, which simplifies upgrading of an installation (only the rear module needs to be replaced). A wide choice of communication interfaces is also integrated: USB port, serial link, Ethernet and CANopen.

Operation

With their fast multitasking processors, the HMI controllers combine HMI and control functions and share the same screen and communication features and dimensions. The internal memory can be freely used by both the HMI function and the control function.
Processing is split 75% on the HMI part and 25% on the control part. The processing can be configured for 3 tasks, including 1 primary task.

Green product

Harmony SCU is a Green Premium product designed to provide full transparency on environmental impact:
■ Transparent environment information
■ Complaint to RoHS and REACH
■ Life cycle analysis, compliant with ISO14025
■ Circular instructions

Schneider Electric

Harmony SCU
HMI controllers for simple machines with up to 16 Is/10 Os

SoMachine

*EcoStruxure Machine Expert*

Vijeo Designer (included in SoMachine or EcoStruxure Machine Expert)

Configuration

Harmony SCU are configured using Schneider Electric's unique machine automation software, SoMachine and EcoStruxure Machine Expert.

This software, combining both HMI and control functions, is based on Vijeo Designer software *(1)* running on Microsoft Windows version 7, 8.1, 10, and 11 Professional. SoMachine software *(1)* boasts an advanced user interface with many configurable windows, enabling unique projects to be developed quickly and easily.

Communication

Examples of communication architectures
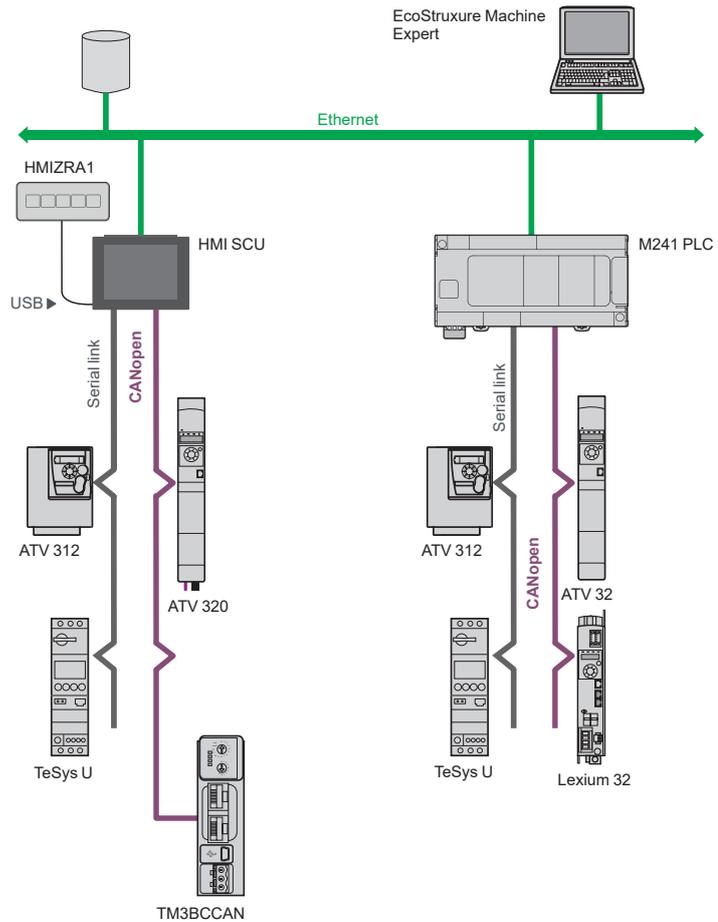

The HMI contollers panels communicate with automation devices through one integrated serial link using the following communication protocols:

■ Harmony SCU HMI controllers
  - Schneider Electric Modbus protocol managed by Control part
  - Schneider Electric (Uni-TE , Modbus) protocols managed by HMI part
  - Third -party protocols (Mitsubishi Electric, Omron, Allen-Bradley and Siemens) managed by HMI part

They can be connected to Ethernet TCP/IP networks with the Modbus TCP protocol or a third-party protocol managed by HMI part, and can be used as the CANopen client to control all the peripherals which can be connected on this bus.

In addition, on Harmony SCU, the Modbus TCP Client protocol is supported by Control part with Ethernet network.

(1) For more information please refer to Vijeo Designer software catalog DIA5ED2130614EN and SoMachine software catalog DIA3ED2140110EN.

Harmony SCU
HMI controllers for simple machines with up to 16 Is/10 Os

Functions

Harmony SCU are part of Schneider Electric's Flexible Machine Control concept, a key element in MachineStruxure.

Harmony SCU offer the following HMI functions:
- Display of animated mimics with 8 types of animation (pressing the touch panel, color changes, filling, movement, rotation, size, visibility and value display)
- Control, modification of numeric and alphanumeric values
- Display of current time and date
- Real-time curves and trend curves with log
- Alarm display, alarm log and management of alarm groups
- Multiwindow management
- Page calls initiated by the operator
- Multilingual application management (10 languages simultaneously)
- Recipe management
- Data processing via Java script
- Application support and USB key external memory logs
- Management of serial printers, barcode readers

Harmony SCU have been designed for Transparent Ready architectures and equipment (combination of Web and Ethernet TCP/IP technologies).

With the WebGate function, it is possible to control or carry out maintenance remotely.

Eventually, Harmony SCU will enable a smartphone or a PC tablet to be remotely connected to the HMI application.

Harmony SCU offer the following HMI functions:
- Execution of programmed logic sequences with the five IEC 1131-2 languages (LD, ST, FBD, SFC,IL)
- Management of equipment on the CANopen fieldbus

In addition to the aforementioned functions, these HMI controllers enable management of:
- Integrated digital I/O
- Integrated analog I/O: Voltage, current and temperature (thermocouple, PT100, PT1000)
- 2 high speed counter (HSC) inputs,100 kHz 1 channel or 50 kHz 2 channel
- 2 pulse train fast outputs, PTO/PWM 50 kHz

Harmony SCU
HMI controllers for simple machines with up to 16 Is/10 Os
Harmony HMISCU●A5 HMI controllers
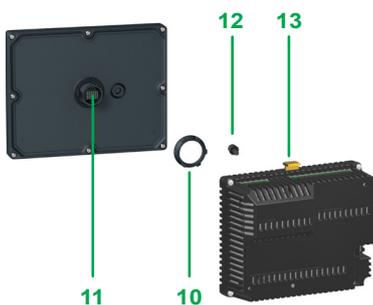

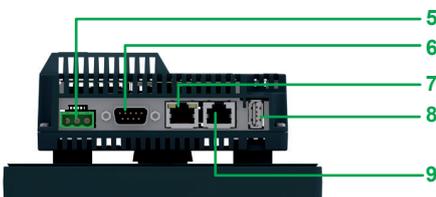

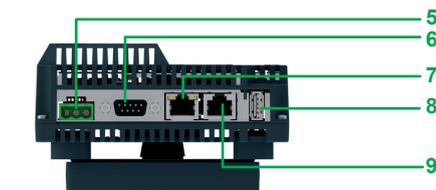

Description
Harmony HMISCU●A5 HMI controllers
Front Panel

To control simple machines, Harmony SCU has the following on the front panel:

1 A 3.5" touch screen for displaying mimics (color TFT LCD)

or

2 A 5.7" touch screen for displaying mimics (color TFT LCD)

Upper rear panel

The upper rear panel has the following:

3 Four removable terminal blocks for 16 digital inputs including 2 high speed counter (HSC) inputs (100 kHz 1 channel or 50 kHz 2 channel), 8 digital relay outputs and 2 source transistor outputs (PTO/PWM 50 kHz or 20 kHz pulse train if HSC used)

Lower rear panel

The lower rear panel has the following:

4 A USB mini-B device connector for application transfer (on left-hand side of panel)

5 A removable screw terminal block for 24 V ⎓ power supply

6 A 9-way SUB-D connector for CANopen link, fitted with an LED for signalling power supply and system operation status

7 An RJ45 connector for Ethernet TCP/IP, 10BASE-T/100BASE-TX link

8 A Type A USB primary connector for:

☐ Connection of a peripheral device

☐ Connection of a USB memory stick

☐ Application transfer

9 An RJ45 male connector for RS-232C or RS-485 serial link connection to PLCs (COM1)

Fixing system

Harmony SCU consist of a front module (comprising the screen) and a rear module (comprising the CPU plus terminals and connectors). The two modules are fixed together via a hole measuring 22 mm in diameter.

The fixing system contains the following elements:

10 A fixing nut

11 A seal

12 An anti-rotation tee (can be used as an option)

13 A release mechanism: Simply press to separate the two modules once they have been fixed together
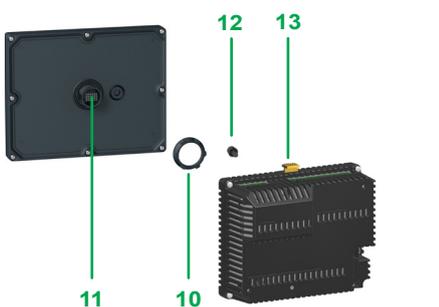

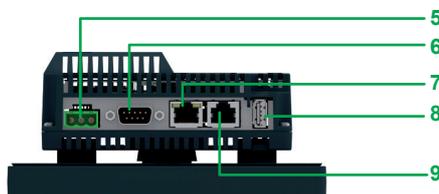

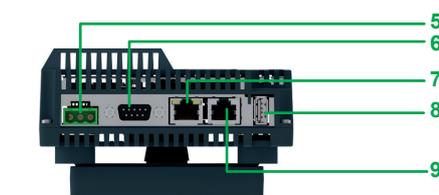

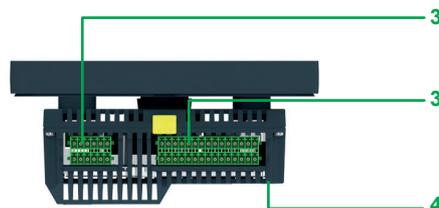

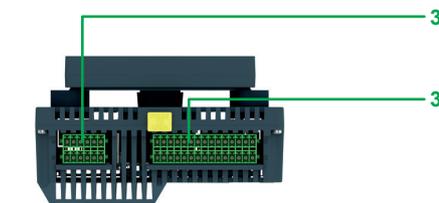

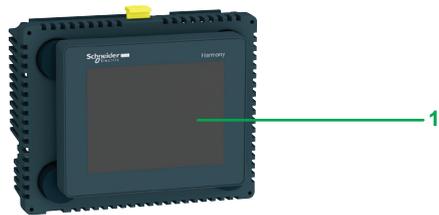

This system is included with the complete products (see).

Note: The 2 modules can also be mounted separately: Using a remote connection cable enables the rear module and the front module to be separated and the Controller module mounted on DIN rail (see).

Schneider Electric

Harmony SCU
HMI controllers for simple machines with up to 16 Is/10 Os
Harmony HMISCU●B5 HMI controllers

Description
Harmony HMISCU●B5 HMI controllers

Front panel

To control simple processes, Harmony SCU has the following on the front panel:
1 A 3.5" touch screen for displaying mimics (color TFT LCD)
or
2 A 5.7" touch screen for displaying mimics (color TFT LCD)

Upper rear panel

The upper rear panel has the following:
3 Four removable terminal blocks for 8 digital inputs including 2 fast HSC inputs (100 KHz 1 channel or 50 kHz 2 channel), 6 digital relay outputs, 2 transistor source outputs (PTO/PWM 50 kHz or 20 kHz pulse train if HSC used), 2 analog inputs (voltage, current), 2 temperature inputs (Thermocouple, PT100, PT1000) and 2 analog outputs (voltage, current)

Lower rear panel

The lower rear panel has the following:
4 A USB mini-B device connector for application transfer (on left-hand side of panel)
5 A removable screw terminal block for 24 V $=$ power supply
6 A 9-way SUB-D connector for CANopen link, fitted with an LED for signalling power supply and system operation status
7 An RJ45 connector for Ethernet TCP/IP, 10BASE-T/100BASE-TX link
8 A Type A USB primary connector for:
□ Connection of a peripheral device
□ Connection of a USB memory stick
□ Application transfer
9 An RJ45 male connector for RS-232C or RS-485 serial link connection to PLCs (COM1)

Fixing system

Harmony HMI SCU consist of a front module (comprising the screen) and a rear module (comprising the CPU plus terminals and connectors).
The two modules are fixed together via a hole measuring 22 mm in diameter.

The fixing system contains the following elements:
10 A fixing nut
11 A seal
12 An anti-rotation tee (can be used as an option)
13 A release mechanism: Simply press to separate the two modules once they have been fixed together
This system is included with the complete products (see).

Note: *The 2 modules can also be mounted separately: Using a remote connection cable enables the rear module and the front module to be separated and the Controller module mounted on DIN rail (see* *).*
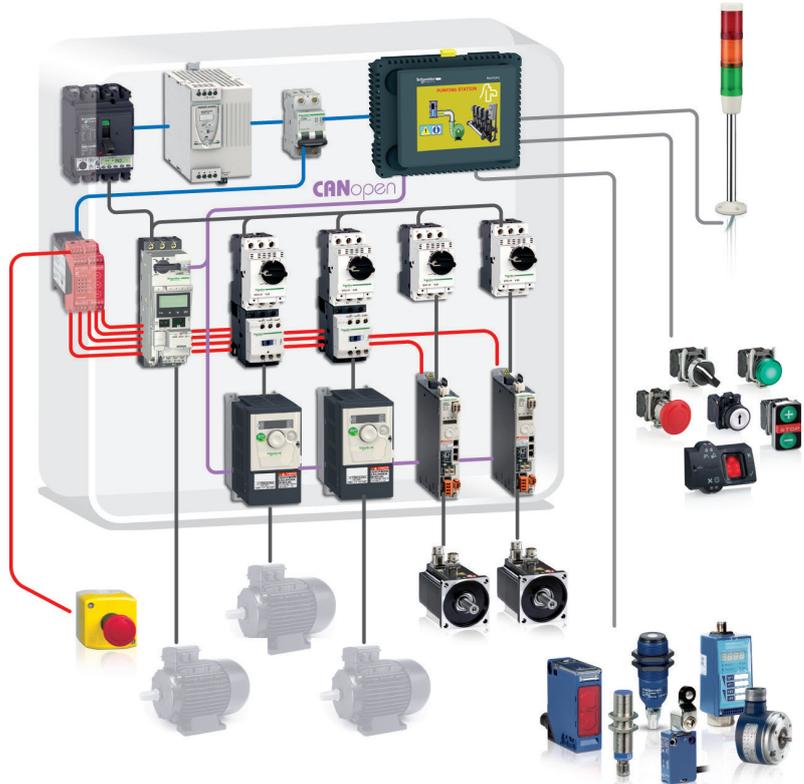

Harmony SCU
HMI controllers for simple machines with up to 16 Is/10 Os
CANopen

Presentation

Harmony SCU Small HMI controllers integrate the CANopen bus client function.

SoMachine and EcoStruxure Machine Expert software are used to configure the CANopen machine bus *(1)* for the Harmony SCU HMI controllers *(1)*.

Example architecture

The above configuration shows an example architecture based on the Harmony SCU Small HMI controllers which provide the CANopen bus client function.
The CANopen bus is made up of a primary station, a Harmony SCU Small HMI Controller and secondary stations. The primary is responsible for the configuration, exchanges and diagnostics to the secondary.

The various services offered are:
■ One or more profiles are supplied for Schneider Electric secondary such as ATV 312/61/71 variable speed drives and Lexium 32 servo drives. This makes it possible to configure the secondary according to a predefined mode. Profiles provide the user with a defined operating mode so there is no need to check how the mode is configured.
■ For third-party secondary:
□ The user can choose from a list which can be modified. This simply involves importing an EDS-type (Electronic Data Sheet) description file.
□ The secondary can be positioned on the bus: The secondary number, speed, monitoring, etc. can be defined.
□ The user can select variables from the list of variables managed by the secondary.
□ A link between variables and the data exchanged.
□ Symbolization of data exchanged.

The CANopen bus is used to manage various clients such as:
■ Digital and analog clients
■ Variable speed drives, motor starters, etc.

(1) For more information on SoMachine software and CANopen bus, please refer to our website www.se.com.
(1) For more information on CANopen bus references, please refer to CANopen for machines catalog DIA3ED2160104EN.

Schneider Electric

Harmony SCU
HMI controllers for simple machines with up to 16 Is/10 Os
Equivalent product table

Equivalent product table between XBTGC panels and HMISCU panels

While upgrading Magelis XBTGC range to Harmony SCU range, the following parameters must be considered:

- Magelis XBTGC is only configurable by SoMachine software, Harmony SCU can be configured by SoMachine and EcoStruxure Machine Expert software.
- Harmony SCU has the same USB Host interface of Magelis XBTGC with a second USB device mini-B port.
- CANopen client managing 16 servers via an external module on XBTGC is now embedded directly on Harmony SCU with same connector SubD9.
- One serial port and Ethernet port are directly available on Harmony SCU.
- Harmony SCU supports more application memory (128 MB) compared to Magelis XBTGC (16 MB).
- Harmony SCU has less backup memory (128 KB) compared to Magelis XBTGC (512 KB).
- Harmony SCU and Magelis XBTGC have same inputs. Outputs on Harmony SCU are based on relays (except 2 with transistors) when compared to Magelis XBTGC with only transistor outputs.
- Harmony SCU doesn't support TM2 modules directly. To keep these TM2 modules on Harmony SCU, an OTB Block or a BusCoupler on CANopen can be used.
- Magelis XBTGC supports four inputs for HSC 100 KHz and Harmony HMISCU supports only two inputs for HSC 100 KHz.
- Magelis XBTGC supports four inputs for PTO 65 KHz and Harmony HMISCU supports only two inputs for PTO 50 KHz.

Old Magelis XBTGC HMI controllers *(1)*		Replaced by Harmony SCU HMI controllers		Compatibility
Description	Reference	Description	References	
3.8" STN screen, amber or red	XBTGC1100T XBTGC1100U	3.5" QVGA color TFT	HMISCU6A5	No cut-out, push-button mounting system Display with identical resolution and 64 K colors
5.7" STN screen, black and white mode	XBTGC2120T XBTGC2120U	5.7" QVGA color TFT	HMISCU8A5	No cut-out, push-button mounting system Display with identical resolution and 64 K colors
5.7" QVGA color	XBTGC2330T XBTGC2330U			

(1) XBTGC2330 must be used if HSC and PTO cannot be converted to HMISCU or if TM2 modules need to be supported directly.

mySchneider, your personalized digital experience

Access an all-in-one customized online experience and benefit from tailored business services, resources, and tools to efficiently support your business operations.

- Efficiency: In just a few clicks, find all the information and support you need to get the job done.
- Simplicity: Use a single login to access all business services, in one place, available 24/7. You no longer need to log in to multiple platforms.
- Personalization: Benefit from content, tools, and business services tailored to your activity, and customize your landing page based on your preferences.
