

Features

- Reflective tape
- Special high-tack pressure-sensitive transparent adhesive for durability
- Aluminium-foil backing material
- Red/ white colour
- 25m length
- 100mm width
- Maximum operating temperature of +25°C
- Minimum operating temperature of 0°C

RS PRO High Visibility Tapes

RS Stock No.: 219-7904

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

Easily bring awareness to a potentially hazardous area with this high-visibility tape from RS PRO. It guarantees a secure bond with its high-tack, pressure-sensitive adhesive backing. Either apply this tape by hand or with a mechanical squeeze-roll applicator.

This 25-metre long, 100 mm wide reflective tape will stick to metal, plastic and rough substrates and works most efficiently when those surfaces are flat. It may not stick well to embossed or compound curved surfaces. Apply this tape in temperatures ranging between 0°C to +25°C. The aluminium foil backing will not add to electrolytic corrosion if the tape is used on other metals.

As part of the RS PRO series, this high-visibility tape is thoroughly tested for quality and consistency. Red / white high-visibility tape is commonly used in workplaces and public spaces to highlight possible trip hazards such as steps or uneven flooring.

General Specifications

Colour	Red/White
Backing Material	Aluminium Foil
Tape Type	Reflective Tape
Adhesive Material	High Grade Solvent Acrylic
Width	100mm
Length	25m

Operation Environment Specifications

Maximum Operating Temperature	+25°C
Minimum Operating Temperature	0°C
