RS PRO Needle File Set

RS Stock No.: 381-4846

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

From RS PRO, this 5 piece diamond needle file set is ideal for precision work. With a variety of profiles included, this high-quality set allows for detailed shaping and smoothing of metal, wood or even stone. As the files are electroplated with D126 medium diamond grit, they are suitable for materials that other needle files may not be. For example, they are able to use with tungsten carbide, 40 HRC and above hardened steel, and gold.
