

Datasheet

EBP CORD, 4M LONG

RS-122-9153

Unless otherwise noted, tolerance $\pm 10\%$
 Specifications and procedures subject to change without notice.

Features:

- Built-in 10mm socket fits 10mm stud on mat
- 1 megohm resistor built into socket
- Accepts up to two banana plugs from wrist straps to connect to ground
- 4mm banana plug termination
- 4m long cord

"EPA ground cords shall be used to make electrical connections between groundable points and the EPA ground facility.

Where a single resistor is used in the EPA ground cord, this shall be located near the groundable point. Where more than one resistor is used, a resistor of a minimum resistance value of one half the total resistance shall be located near the groundable point.

When accessible, the EPA ground cord and its groundable point connection shall be shrouded by insulating material." (EN 61340-5-1 section 5.3.4 EPA ground cords)
