

Datasheet

Polyester Heater Jacket 800 x 1950mm (1800mm Heated length)

RS Stock Number 179-9551

Description

Manufactured from polyester fabric with a flame-retardant polyurethane coating, the internal thermal insulation layer is a stitched glass filament blanket.

Fixing is via quick release buckles on high temperature webbing straps.

The internal heating element comprises high performance resistance wire spiral wound on to a glass core with silicone extruded insulation.

Temperature control is by an inbuilt digital thermostat with process timer.

The actual maximum running temperature achievable will depend on the product being heated.

Technical Specification

Electrical Rating:	230V 1200W
Thermostat:	0-90°C Digital
Suits Drum Diameter:	575mm to 595mm

Features and Benefits

- Polyester PU Coated Fabric
- IP40 Protection
- Double Insulated Construction
- Inbuilt Thermal Insulation
- Simple Strap & Buckle Fixing
- 4m Power Cable

Applications

The ideal solution to heating products contained in standard 200l steel drums.
