Description

Split Cable Wrap is a non-expandable sleeving woven from monofilament (weft) and multifilament (warp) polyester yarns. It provides a lightweight, cost-effective and tough solution for the protection of a wide range of components. Its inherent flexibility allows it to bend, coil and conform to irregular shapes, while its split design allows it to be installed on assembled cable harnesses.

Applications

Most commonly used on wire harnesses, cable assemblies, flat ribbon cables, tubes and hoses to provide tough, durable protection for automotive, telecom, automatic equipment, railways and panel boards.
