

# RainSaver Rainwater Harvesting System

## Rejang 600

Designer rainwater storage tank

### Description:

- Designed to naturally match with most buildings exterior.
- Optimized footprint for capacity and minimal space requirement
- High strength and durability materials and construction
- Low height to facilitate easy maintenance.

### ZeO Tech

- 1) Proprietary storage tank design to ensure the quality of rainwater during storage.
- 2) Defends against UV attack to ensure long-term structural integrity.
- 3) Additional reinforcement at joint areas to minimize deformation and leakages.
- 4) Resists mosquito intrusion and proliferation through special treatment in the inner lining.
- 5) Prevents algae growth.

### Technical Data:

Capacity:	600 liters
Dimensions:	1,500 x 450 x 1,400 mm (height)
Material:	HDPE (UV-resistant)
Surface finish:	Smooth Stone effect (optional)

Dimensions and capacities of products are approximate due to manufacturing tolerances.
