RS Stock No.: 236-3583

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

Use this drawer storage unit to keep your workspace tidy and organised. It has 16 drawers to keep small items like hardware separated and handy. The unit itself is stackable to let you make the most of available space.

Easy to access, the drawers are made from lightweight and durable polypropylene for smooth action and durability. As they're translucent, you can see what's inside them and there's a slot at the front for labelling. The cabinet's high-impact plastic casing features dovetail slots that securely fit together with other storage units of the same kind. A 208 mm wide by 208 mm height square shape makes them convenient to stack on top of each other or side by side.
