RS PRO 5bar Water Filter Kit

RS Stock No.: 738-2722

RS PRO Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

The RS PRO drinking water filter kit is used to provide clean, fresh water with a choice for hard water or soft water areas. Water from the mains is connected to the cartridge through the self cutting tap. Once installed, the water is then directed up through the cartridge media. This process eliminates the unwanted contaminants and supplies fresh drinking water through a touch tap.
