

## FEATURES

- Plain washer
- Outer diameter of 18 mm
- Inner diameter of 6.4 mm
- Thickness of 1.6 mm
- For use with M6 screws and bolts
- A2 304 stainless steel construction for durability and corrosion resistance
- Complies with RoHS (restriction of hazardous substances) standards

## Stainless Steel Plain Washer, 1.6mm Thickness, M6, A2 304

RS Stock No.: 797-6257

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

## Product Description

An essential part of any fastener assembly, these stainless steel washers extend the lifespan of joints by reducing wear and tear due to friction. Using washers in electronic, food, chemical and construction settings enhances even load distribution and reduces pressure, preventing distortion of mating surfaces over time. Washers also ease maintenance operations by allowing for smoother loosening and tightening of components.

These plain washers follow DIN 9021 dimensions and are compatible with M6 screws and bolts. Their high-grade A2 304 stainless steel construction ensures durability and good corrosion resistance. Stainless steel washers play an important part in preventing galvanic corrosion, particularly by insulating steel fasteners from aluminium surfaces.

## General Specifications

<b>For Screw/Bolt Size</b>	M6
<b>Material</b>	Stainless Steel
<b>Finish</b>	Plain

## Mechanical Specifications

<b>Inside Diameter</b>	6.4mm
<b>Outside Diameter</b>	18mm
<b>Stainless Steel Type</b>	A2 304
<b>Thickness</b>	1.6mm
<b>Specification</b>	DIN 9021

## Approvals

<b>Compliance/Certifications</b>	RoHS
