RS Pro Rope Pull Kit, For Use With All Rope Pull Switches

Product Details:

RS Rope Kits for All Rope Pull Switches

- Supplied with all fittings and fixtures required to install any rope pull switch, including hazardous area versions
 - Stainless steel grade 316 and the cable is multi-strand galvanised steel covered with PVC
 - Two thimbles, collar clamps and "D" shackles are provided for securing each end of the grab wire to the safety switch
 - Stainless steel tensioner provided for switches that do not have this feature built in
 - Sufficient M6 eyebolts with locking nuts are provided to support the wire at approximately 2 to 3m intervals
 - First and last supports should be placed no more than 300mm from the end of the switch to ensure that the pull on the switch is linear
 - Vital for correct operation to ensure that the wire is free running when pulled
- Rope may be cut to any suitable required length
