How much protection can these wall mount boxes provide?

Having an ingress protection of IP66, all models are completely protected against any dust which may harm sensitive equipment. No dirt or small particles will be able to enter the enclosure whilst sealed. The excellent protection rating also ensures great water resistance and sufficiency against high pressure water jets.

What is supplied with these lockable boxes?

All models include a zinc-coated steel back plate, door mounting plate, gland plate and a sealing gasket. Fixing accessories are also supplied directly with the box, once a suitable surface is identified, it will be simple and easy to mount it and begin using immediately.

What is a wall box?

Wall boxes are a type of enclosure which can be mounted to a wall, by brackets or into panel cut outs as an example. These types of boxes are used in various applications for storage of items or sensitive electrical equipment like wiring or circuit boards. The boxes have various ways of being covered, such as locking, screwed or simple latches. Regardless of the need, there will be the right RS Pro wall box at competitive prices to suit the requirements.

What kind of lock is supplied?

This particular box comes with a triple lock system for extra security and safety. Having a wall box under lock and key is useful in various situations where the contents either need to be secured or only accessed by experienced individuals.
