RS Pro Automatic Drain Valve

Specifications:

- Drain Type: Automatic
- Inlet Port: G 3/8
- Outlet Port: G 3/8
- Supply Voltage: 240V AC
- Body Material: Brass
- Seal Material: NBR
- IP Rating: IP65
- Height: 123mm
- Width: 44mm
- Operating Pressure: 0-10 bar
- Media: Neutral gasses and liquids
- Operating Temp Timer : -10 to +60 C
- Operating Temp Valve: -10 to +50 C (ambient)
- Operating Temp Valve: -10 to +90 C (media)

Features:

Automatic Drain Valve – 240V 50Hz

RS Pro automatic drain valves are designed to provide automatic draining of filter bowls, separators, receivers and other components. The automatic drain valve is effective at removing condensate and contaminants. The interval time for draining can be preset to meet the requirements of your pneumatic installation

- Precise self-activated control of fluids and air to a specified programme
- Automatically opens for a set time to drain condensate
- Discharge time 0.5 – 10 seconds
- LED indicator for operational status
- Test facility for manual override
- IP 65 timer and solenoid protection, including electrical connector
