

AMPMODU 2 mm WIRE-TO-BOARD CRIMP RECEPTACLES

TE Connectivity's (TE) AMPMODU 2 mm connectors reliably and economically meet the packaging and interconnection requirements of today's miniature sophisticated electronics, occupying 38 percent less space on a PCB than traditional 2.54 mm [0.100"] centerline connectors. The new Wire-to-Board crimp receptacle family includes standard and detent latching housing styles along with contacts for wire ranges 30 - 24AWG [0.05 - 0.22 mm²]. The receptacle assemblies utilize phosphor bronze contacts with dual cantilever beams in gold or tin plating options. Connectors are available in a single and double row, from 2 to 25 positions per row. The housing design with detent latches offers a reliable interconnection in high-vibration industrial environments. Additionally, wire termination is easily accomplished with TE-recommended hand or applicator tooling. Along with TE's Board-to-Board portfolio, the 2 mm crimp receptacle family can meet a wide variety of customer requirements.
