AlphaTec®

TRAINER TYPE CV/VP1/T

Formerly known as TRELLTRAIN

Saves the real suit until it is really needed

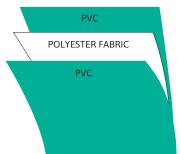

- Helps maintaining preparedness without wearing out the 'real' suit
- Intended for training only, but designed in the same way as the AlphaTec® gas-tight suits to offer as realistic training as possible
- Available in the same designs as the gas-tight intervention suits (type CV, VP1 and T) to fit all user preferences and training needs
- Encapsulating suits available in a soft visor option
- Made from a strong, durable and flexible material, which withstands many hours of training

Applications

• Chemical Intervention Training

Material Construction

.

AlphaTec®

TRAINER TYPE CV/VP1/T

PRODUCT INFORMATION

encapsulating design type VP1 (larger visor, with hump, BA worn inside the suit) Non-encapsulating type ("With face seal and without hump, BA worn outside the suit) Seams Welded Visor V	PRODUCT INFORMATIO	<u>N</u>
encapsulating design type VPI, (larger visor, with hump, BA worn inside the suit) Non-encapsulating type T (with face seal and without hump, BA worn outside the suit) Strong and flexible polyester fabric, coated with PVC on both sides. Welded Wisor Pisor Piglid 2 mm impact resistant PVC Optionally 1 mm soft PVC Comes in two optional sizes; CV or the larger VPI Face seal Non-encapsulating suits are fitted with an anatomically designed face seal. Scorpio #08-354 neoprene rubber gloves in combination with rubber cuffs. Other glove options are available. The gloves are attached with a Bayonet glove ring system, which offers quick and simple glove exchange. Sewn-in sock/booties made of the suit material. Alternatively PVC safety boots. The boots are fixed with an ergonomically designed ring attachment, for simplified boot exchange. Strong and durable watertight PVC coated zipper. The zipper is closing downwards, and is protected by a flap/splash guard. Ventilation Aventilation system is included as standard. For the safety of the wearer, it provides a constant level of overpressure inside the suit. The Regulating valve has 3 ventilation rates (2, 30 and 100 /min) plus zero/off position and is also available in a passthrough version (for encapsulating suits only) for use with external air supply. Encapsulating suits (VPVPI) have two overpressure valves in the back of the hood. Non-encapsulating suits (type T) have one overpressure valve on the chest.
