

## FEATURES

- Convenient filtration
- An alternative to bottled water
- Better for the environment – less waste
- Slim and compact
- Easily opened flip top lid
- 1.5 litre capacity of filtered water
- Designed to fit most fridge doors
- Dishwasher safe
- Ergonomic anti-skid handle

## RS PRO Water Filter Systems

RS Stock No.: 2499550

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Slim and compact jug filter

### Product Description

*A jug filter is designed to convert tap water into cleaner drinking water through the use of replaceable cartridges. These cartridges come in 2 styles – one for hard water areas that will reduce the limescale, chlorine and bad taste from the supply and the alternative for soft water areas that will reduce chlorine and bad taste.*

*The scale and scum will be removed from tea and coffee and the “swimming pool” smell of chlorine will be removed from ice cubes as well as providing improved taste and reduced contaminants that are present in the supply.*

*Although these are not harmful to health, people’s expectations are now requiring a higher standard of drinking water.*

### General Specifications

<b>Capacity</b>	2 litre total capacity – 1.5 litre capacity of filtered water
<b>Guarantee</b>	12 months
<b>Hard water filter cartridge</b>	Carbon and resin mix
<b>Soft water filter cartridge</b>	Carbon

Hard water cartridge – silver impregnated coconut activated carbon effectively reduces organic contaminants, chlorine, trichloromethane and insecticides. Sodium-less ion exchange resin reduces inorganic contaminants, lead, copper and limescale.

Soft water cartridge – natural coconut carbon effectively reduces chlorine, insecticides, chemical substances and improves taste, whilst also maintaining essential minerals.
